# CLEARs

# NCAA Manual

## NEW DEFINITION 2020:

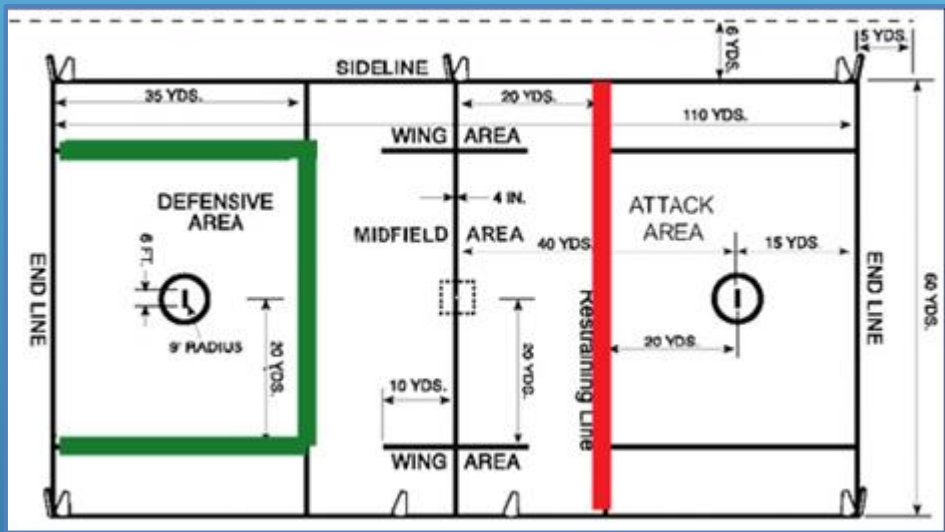

“Philosophy. In an effort to combine the way the rules of clearing are now written with the historical intent of making clears reflect a team’s ability to transition from a settled defensive possession to an offensive possession, the definition of a successful clear will be changing radically for the 2020 season.

# CLEARs

# NCAA Manual

As a basic rule of thumb, ... a decision on successful vs. unsuccessful clears should be made on whether, in the best judgement of the official scorer, a team crossed midfield and legitimately had an opportunity to begin running its offense.”

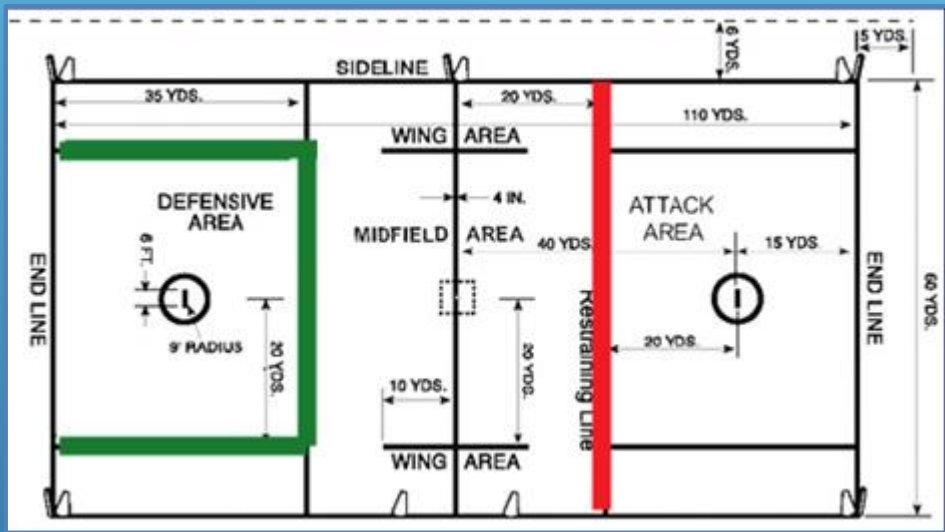

# CLEARs

# NCAA Manual

Successful clears are now defined as beginning any time a team takes possession of the ball (or enters into the area) behind the restraining line.

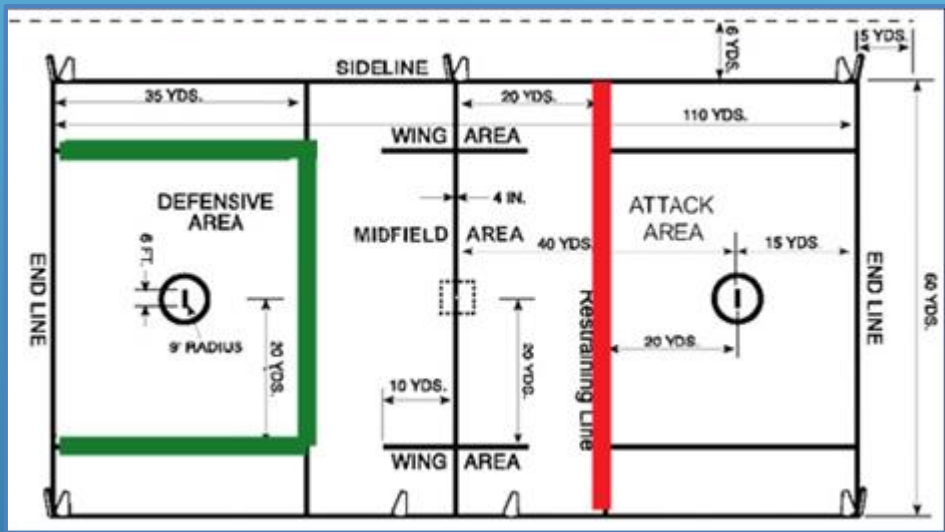

Successful clears end when the team crosses the midfield line and meet one of three conditions:

# CLEARs

# NCAA Manual

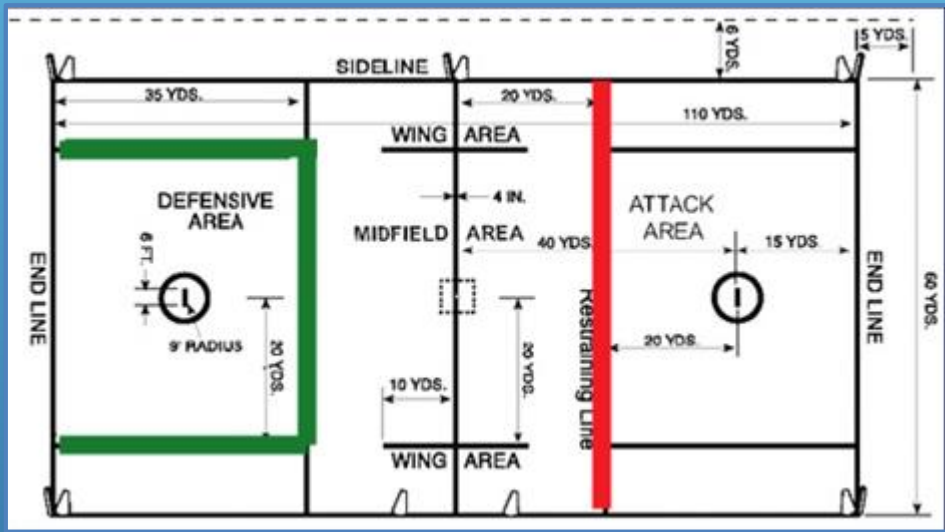

- 1 – The Player takes a shot
- 2 – The Player makes a pass
- 3 – The Player had the ability to meet criteria 1 or 2 but chooses not to “of his own accord”

# CLEARs

# NCAA Manual

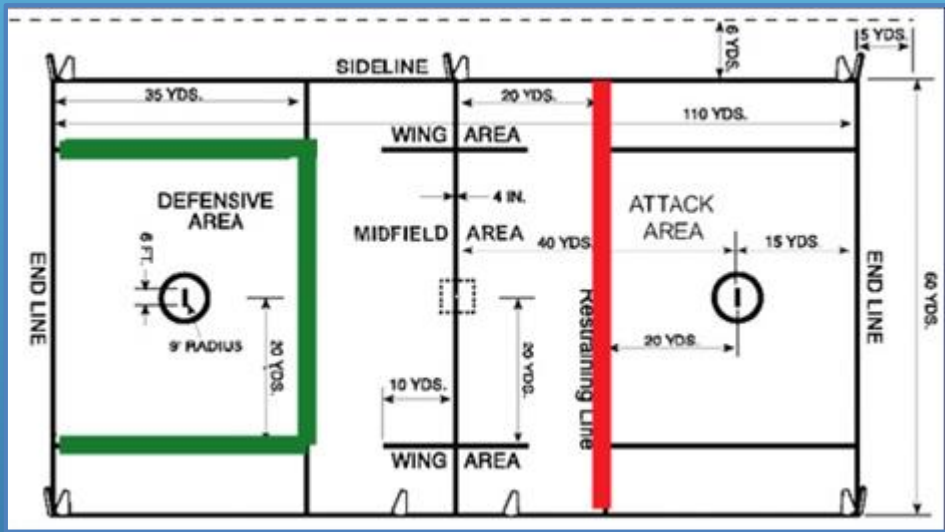

“A.R.1– Team A is on defense. Team A forces a turnover and gains possession below its restraining line. Player 1 then throws a pass to Player 2, who catches the ball and then runs across the midline. Before Player 2 can shoot or pass, he turns over the ball.

# CLEARs

# NCAA Manual

“A.R.2– Team A is on defense. Team A forces a turnover and gains possession below its restraining line. Player 1 then throws a pass to Player 2, who catches the ball and then runs across the midline. Player 2 then passes the ball to Player 3.

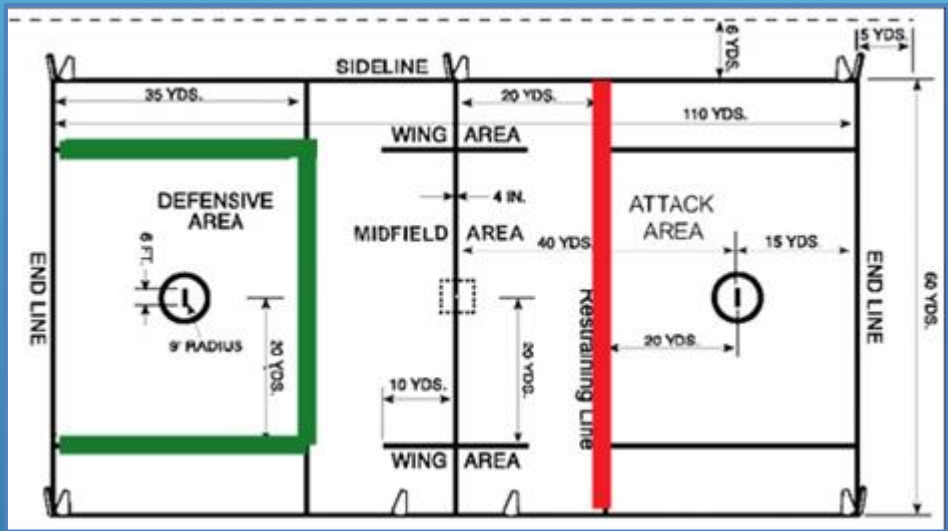

# CLEARs

# NCAA Manual

“A.R.3. After Team A gains possession of the ball (behind the restraining line) and Player A is the first person to possess the ball across the midfield line. Player A is closely guarded by the defense and is unable to find a teammate to pass to or get a shot off before turning over the ball.”

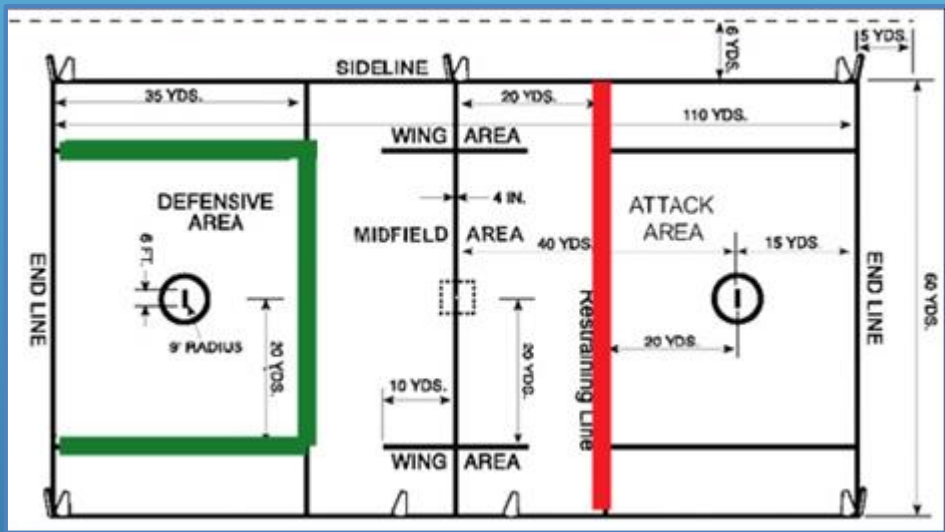

# CLEARs

# NCAA Manual

“A.R.7. Team A takes possession of the ball above the restraining line on its defensive side and brings the ball below the restraining line.

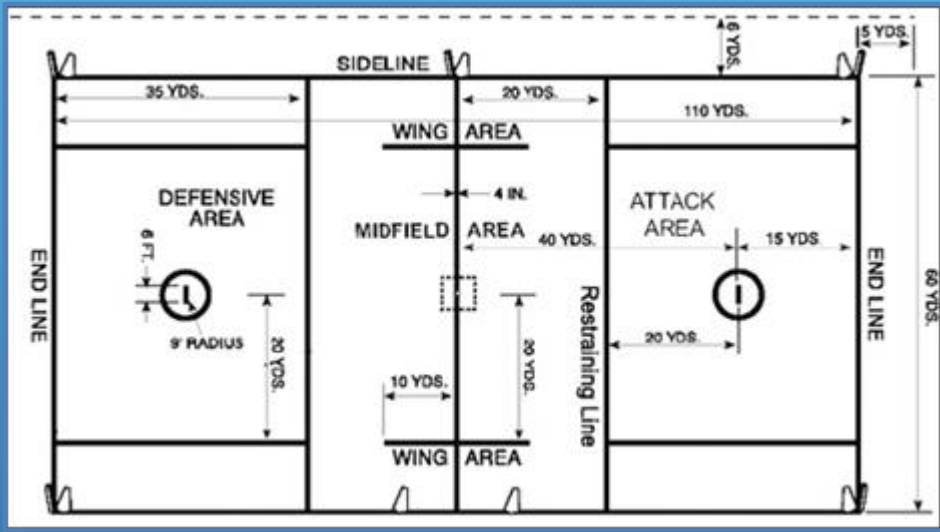

# CLEARs

# NCAA Manual

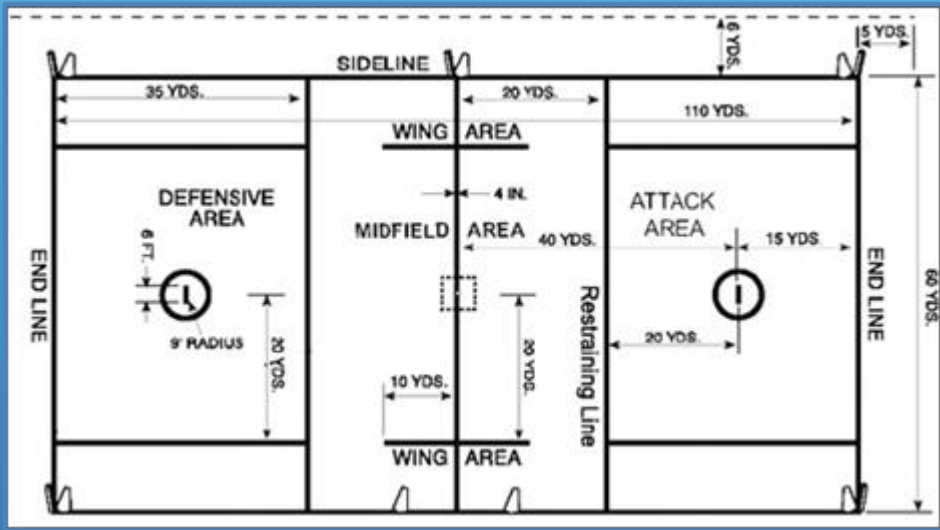

“A.R.11. Defenseman A1 gains possession of the ball behind the restraining line, but not in the box. Team A clears the ball without ever going into the box.”

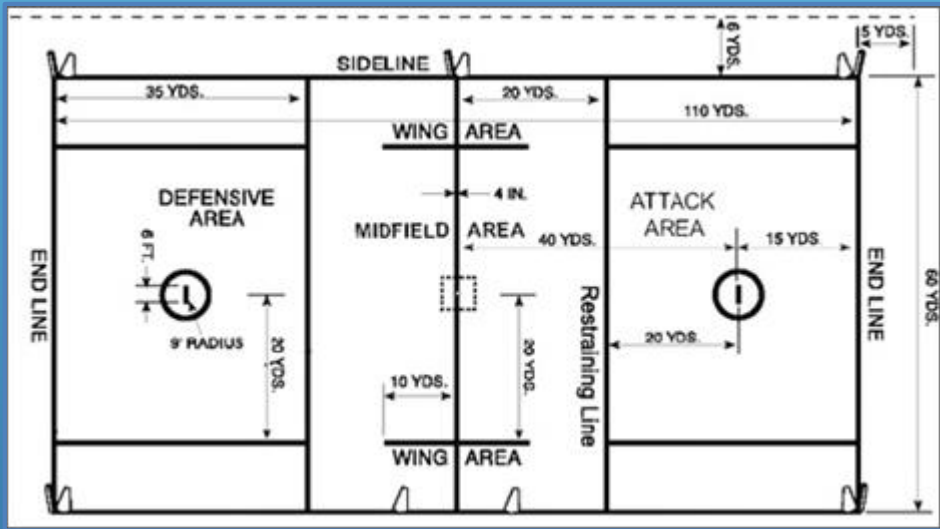

# Question

The goalie makes a save and begins to clear the ball. He passes it to a midfielder who crosses the midline. Is this a successful clear?

# Question

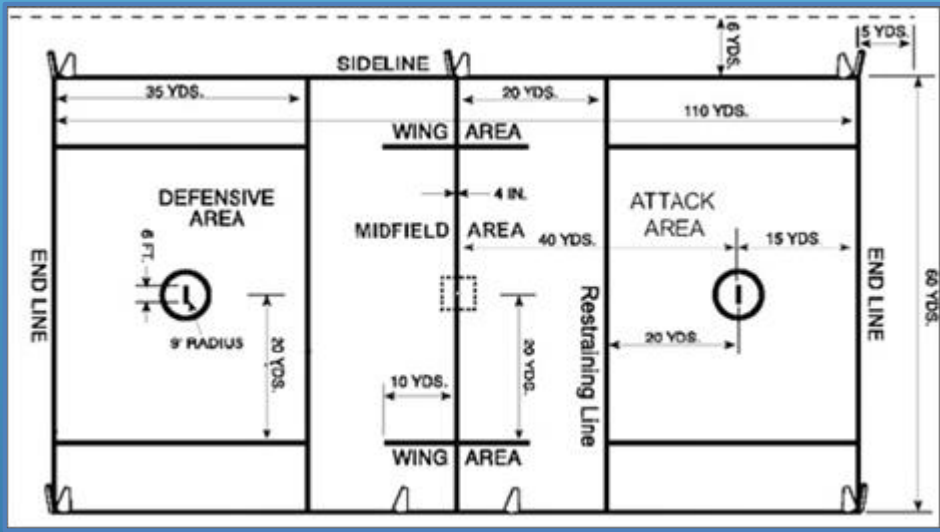

Team A starts a clear but the ball is knocked out of their stick. A midfielder on Team A picks the loose ball and runs it over the midfield line (and pass/shot). Is this a successful clear?

# Question

A defenseman knocks down a pass which deflects outside the front of the goal area. He picks it up and runs to his offensive goal area.

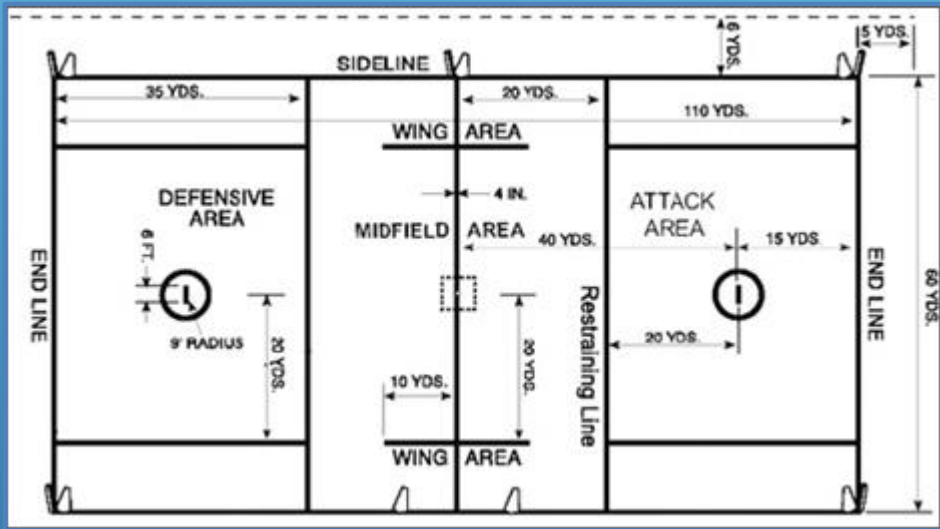

Is this a successful clear?

# Question

A defenseman knocks down a pass which deflects outside the right of the goal area. He picks it up and runs into the defensive area. Is this the start of a clear?

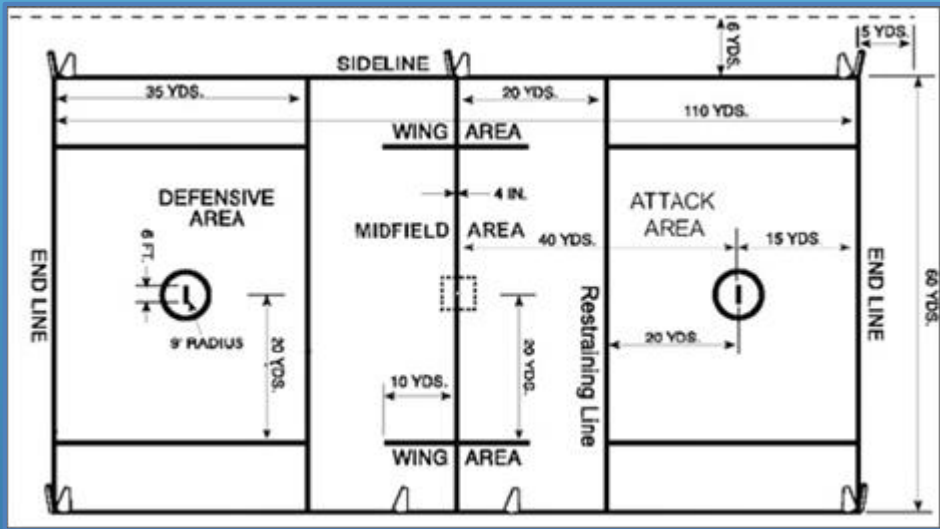

# SHOTS

# NCAA Manual

“A ball propelled toward the goal by an offensive player shall be called a shot. The ball may be thrown from a stick, kicked, or otherwise physically directed to be credited as a shot.”

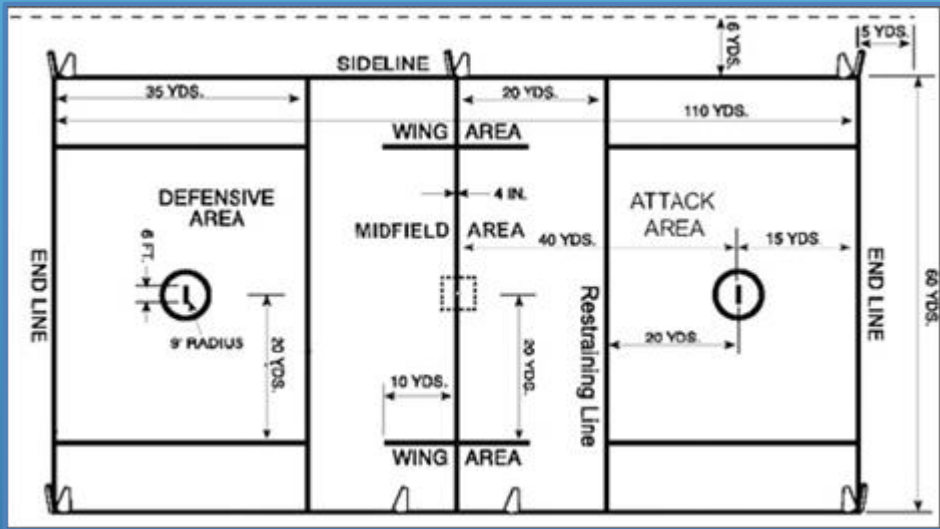

# SHOTS

# NCAA Manual

“The statistician should take care to award shots only when possession of the ball can reasonably be said to have occurred or by ricochet or when a controlled effort can be construed somewhat similar to controlled tips in basketball).”

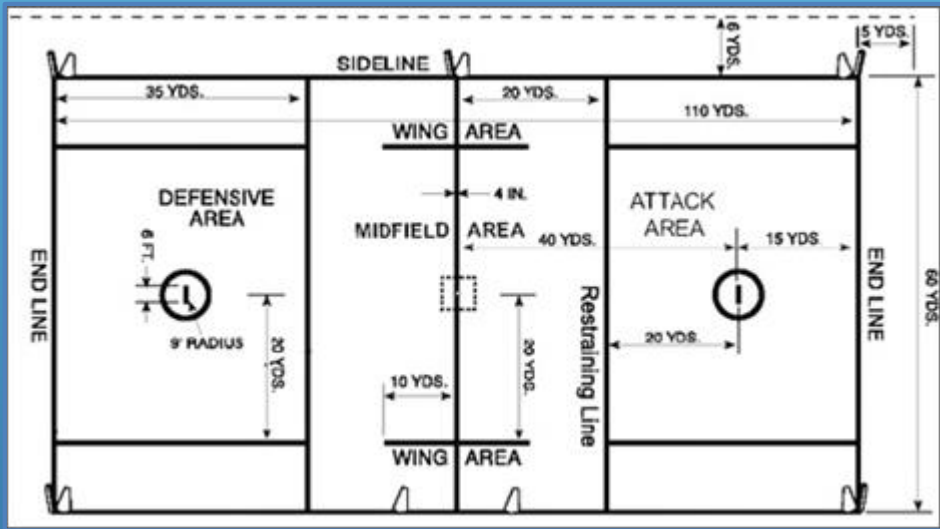

# SHOTS

# NCAA Manual

“Article 2. A ball that enters the goal propelled by the offensive team must then become a shot and a goal.

Article 3. A ball that ricochets off another player and enters the goal will be credited as a shot by the player deemed to have scored the goal...”

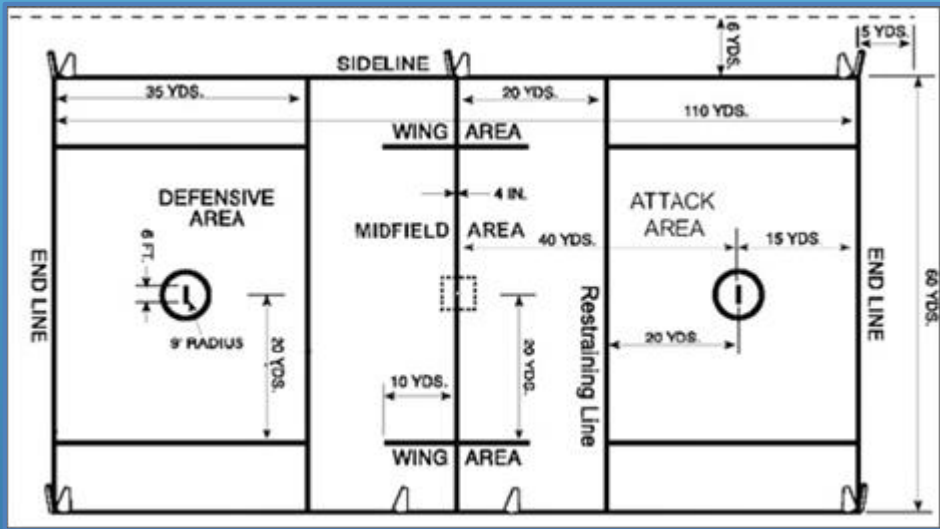

# SHOTS

# NCAA Manual

“Article 4. In the case of a team goal (also known as an own goal), there is no shot recorded.

[See Goals for more definitions.]

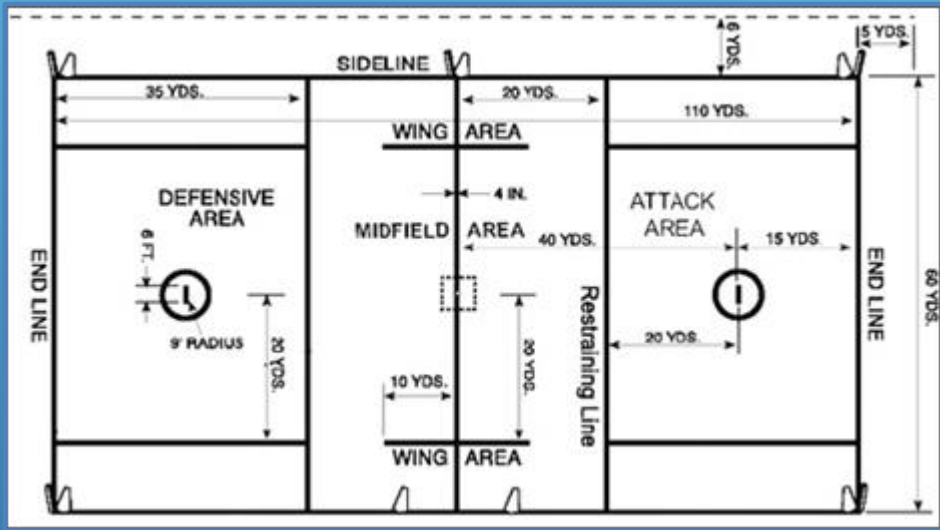

# SHOTS

# NCAA Manual

“NOTE: One of the most common mis-definition in lacrosse is that of “shot on goal.” A shot on goal is not the same thing as a shot at the goal. The latter encompasses all shots; the former encompasses only shots scoring and those having been saved by the goalie. A shot that hits the pipe is not a shot on goal.”

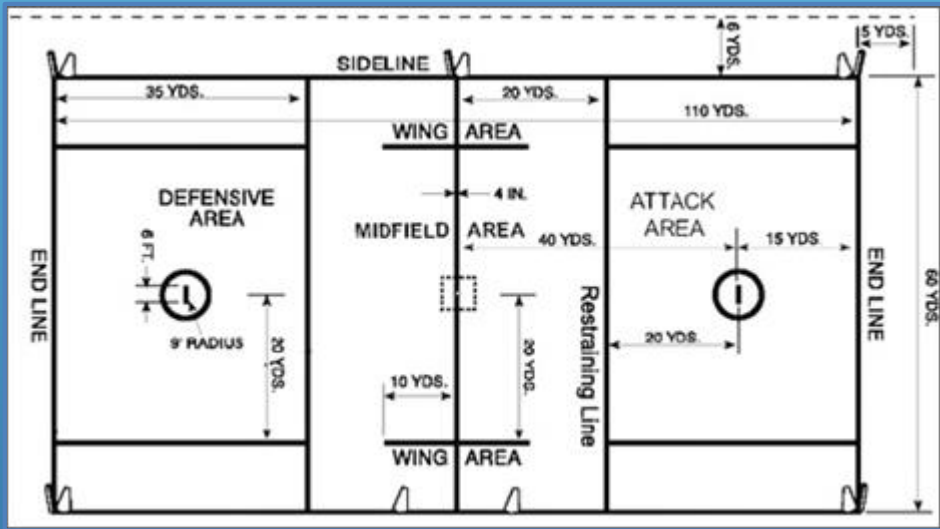

**BLaxFive.NET**

# GOALS

# NCAA Manual

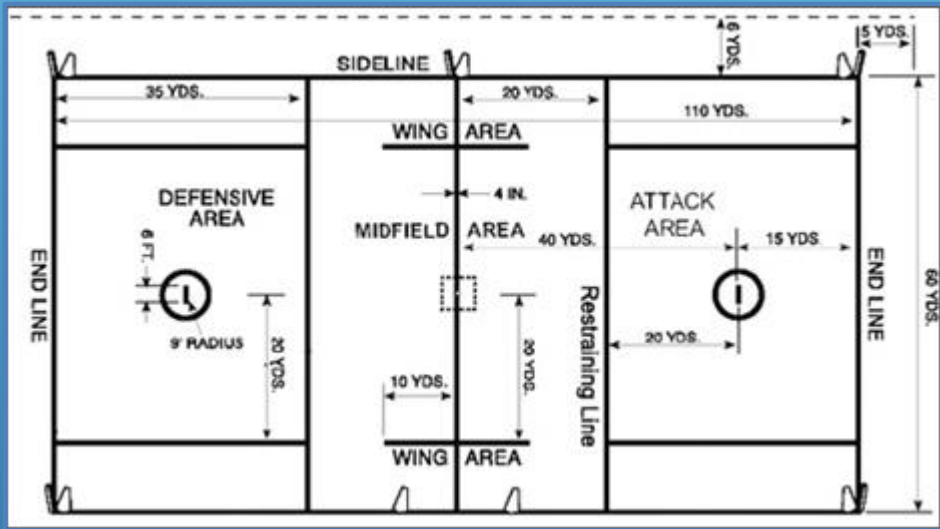

“Article 1. A goal should be credited to the player who shot the ball, scoring a goal for his own team. In certain situations, a team goal (also known as “own goal”) may be credited. However, statisticians should err on the side of awarding the goal to the player who took the original shot.”

# GOALS

# NCAA Manual

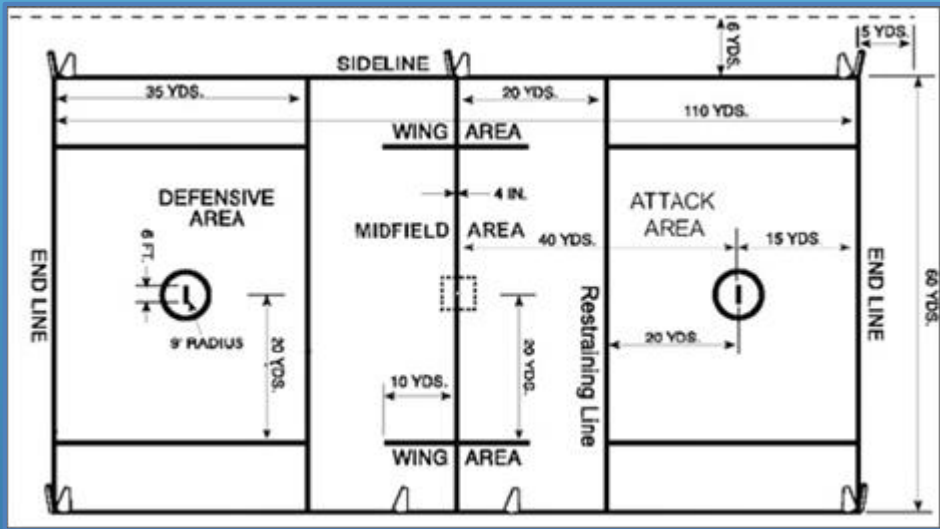

“(1) A shot that strikes another offensive player and deflects into the goal should be credited as a goal to the player who last touched the ball before it entered the goal. The player credited with the goal must also be credited with a shot; the original shooter should be credited only with a shot, not an assist.”

# GOALS

# NCAA Manual

“(2) A ball entering the goal that appeared to have been a pass to another player shall be counted as a shot and a goal for the player who made the pass.”

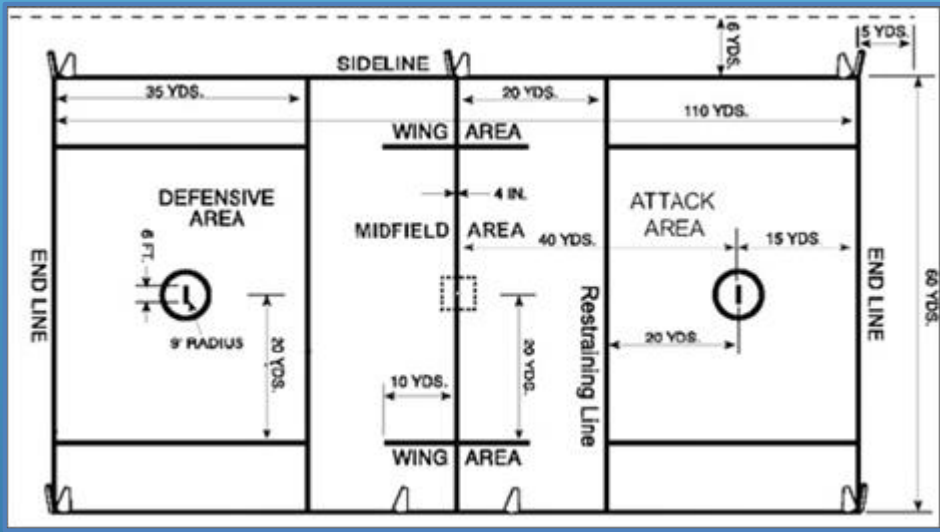

# GOALS

# NCAA Manual

“(3) A team goal will be credited if a defensive player gains possession of the ball and then causes the ball to enter his own team’s goal.”

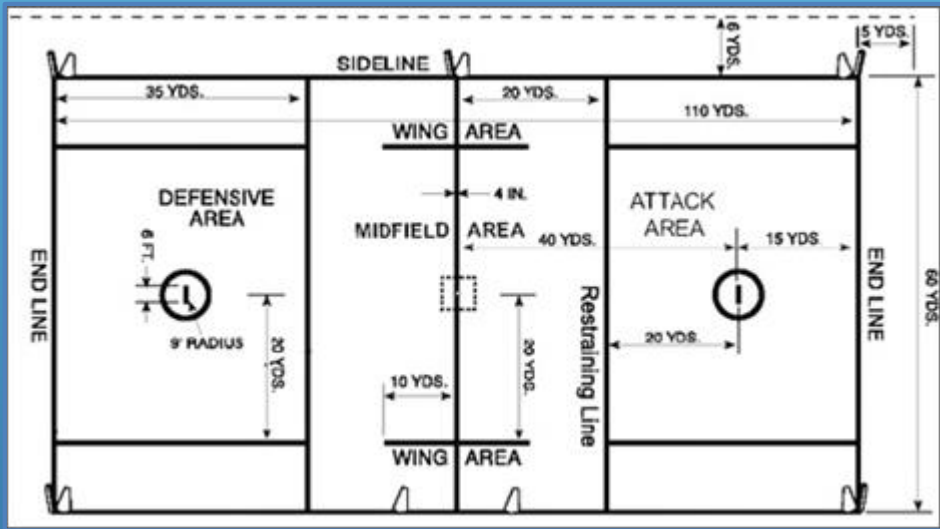

# Question

A player takes a shot which bounces off a defenseman and scores.

Who gets credit for the goal/assist?

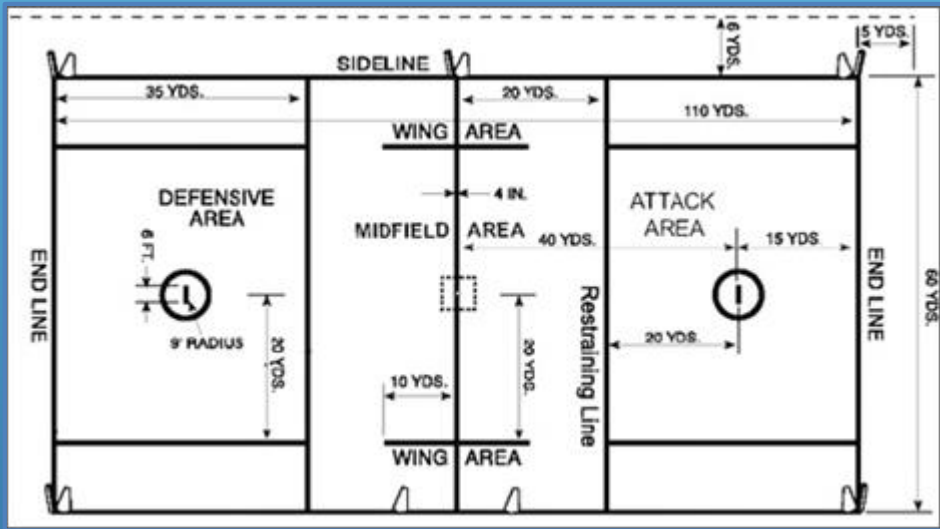

# Question

A player takes a shot which bounces off a teammate and scores.

Who gets credit for the goal/assist?

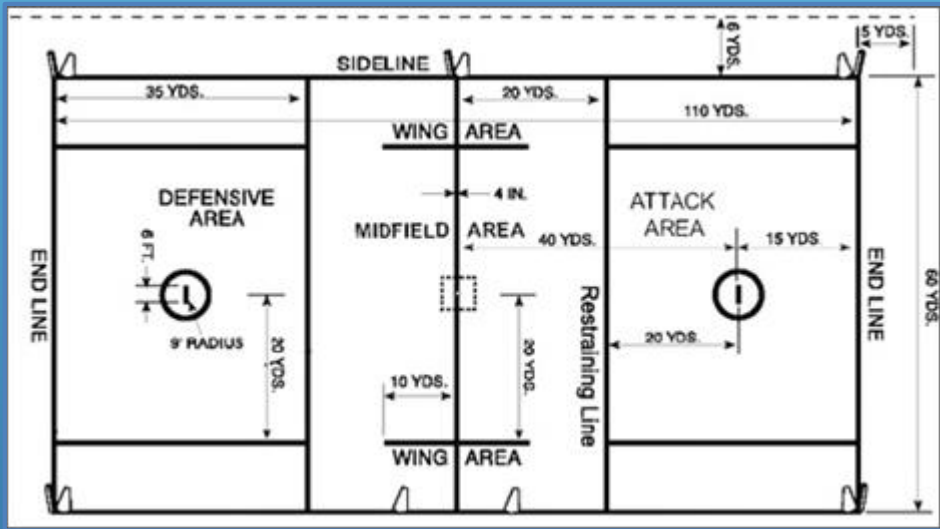

# ASSISTS

# NCAA Manual

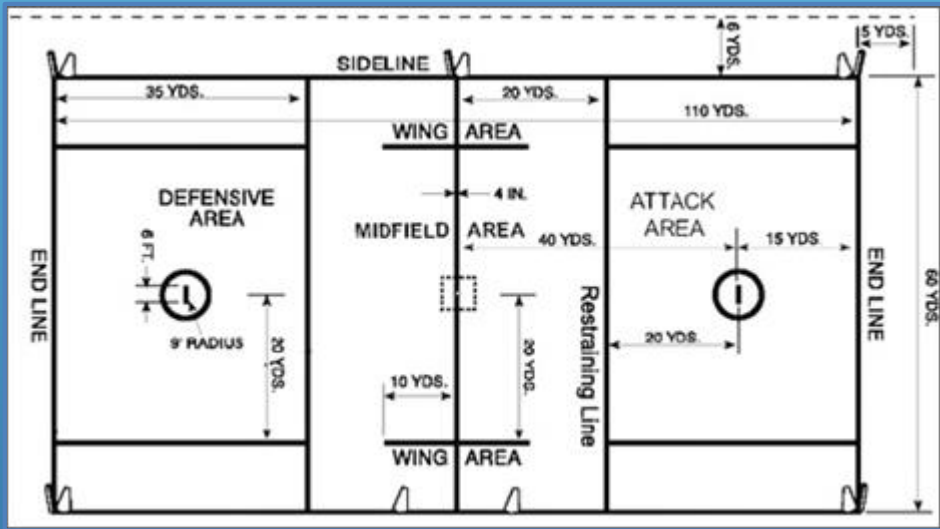

“Philosophy. An assist is not necessarily credited to a player who makes a pass before a goal. There should be conscious effort on the part of the passer to find an open player for a shot or to help a player work free for a shot.”

# ASSISTS

# NCAA Manual

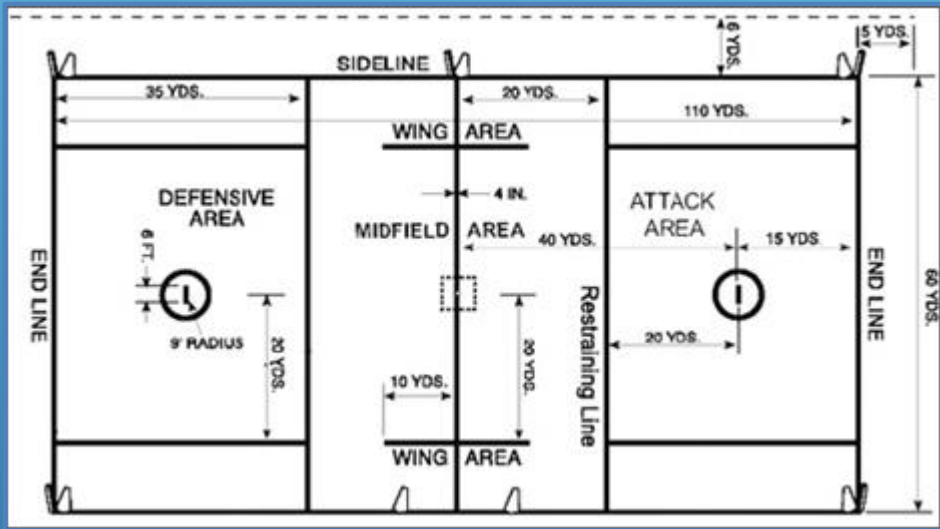

“There should be no particular time frame for an assist (although the pass and shot should appear to be part of the same play) nor should there be any rigid distance factor in the play (the player scoring the goal could take one step, several steps, or even run a number of yards with the ball and still have the passer credited with an assist).”

# ASSISTS

# NCAA Manual

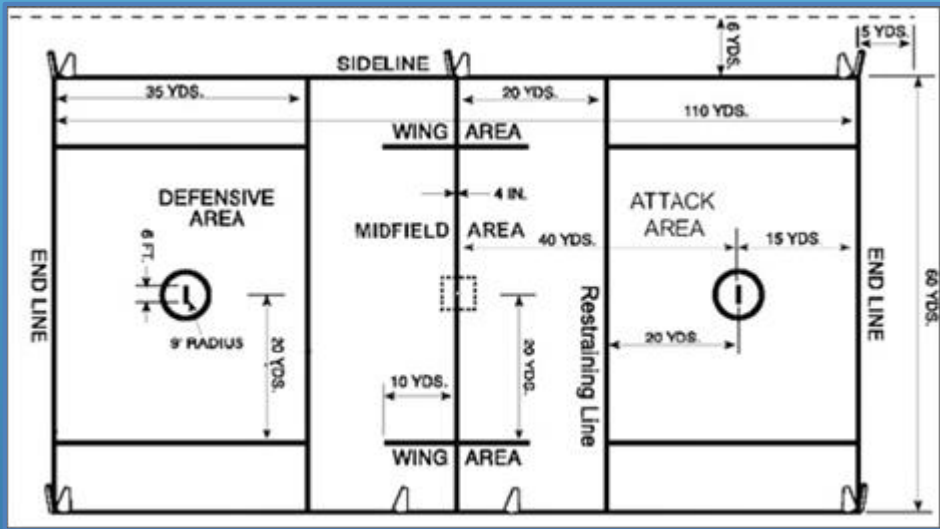

“An assist should not be credited on a play when the goal scorer dodges a defensive player after receiving the pass before shooting unless, in the opinion of the statistician, it was the pass itself and not the dodge that led directly to the shot.”

# ASSISTS

# NCAA Manual

“Article 1. A player is credited with an assist when he makes, in the opinion of the statistician, a pass contributing directly to a goal. An assist cannot be credited to any player other than the one who had the ball immediately before the player credited with the goal.”

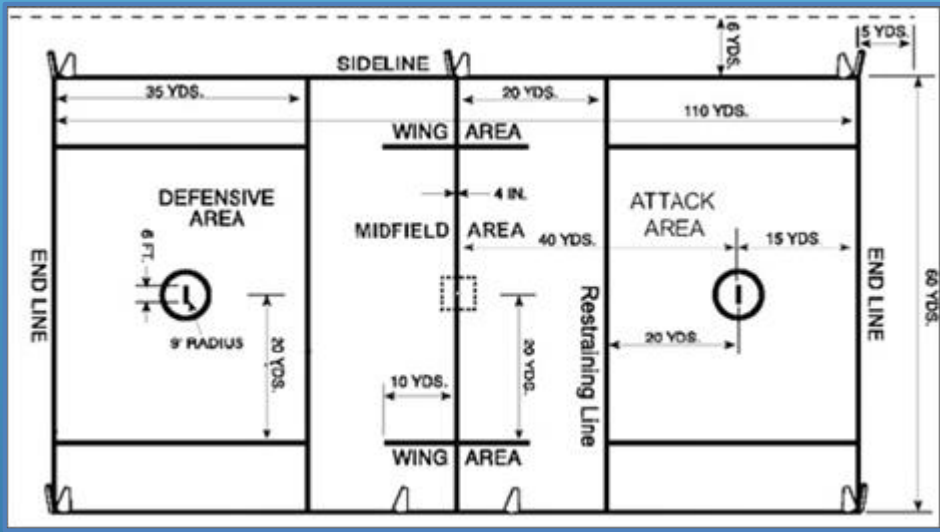

# ASSISTS

# NCAA Manual

“Article 2. A goal that is scored when the ball deflects off of an offensive player into the goal can have an assist if, in the scorer’s opinion, the player whose action caused the ball to deflect off of the second player was attempting to pass and not shoot.”

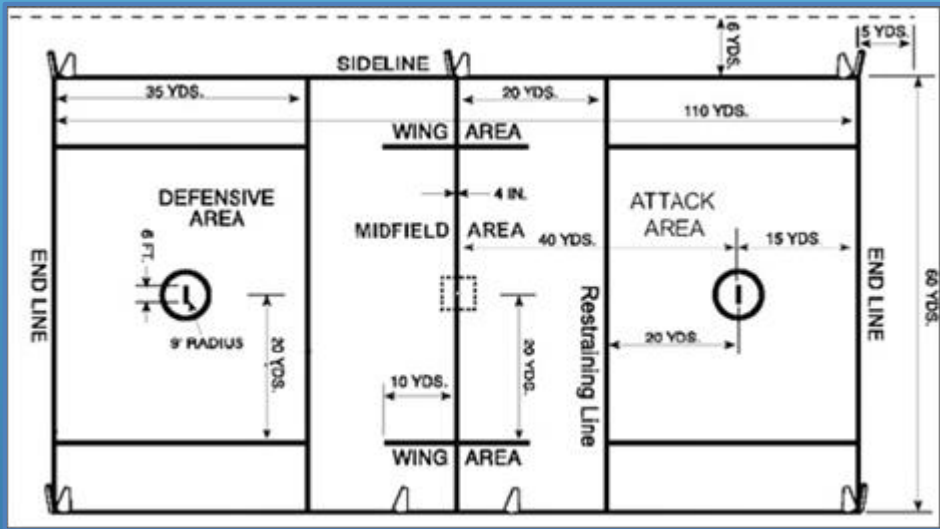

# Question

After three steps (or two seconds) there cannot be an assist on the play.

True or False?

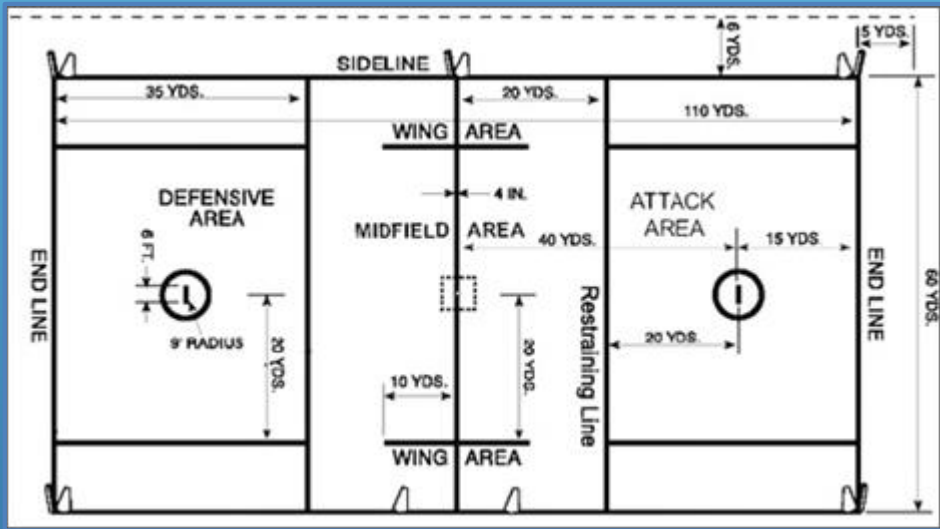

# SAVES

# NCAA Manual

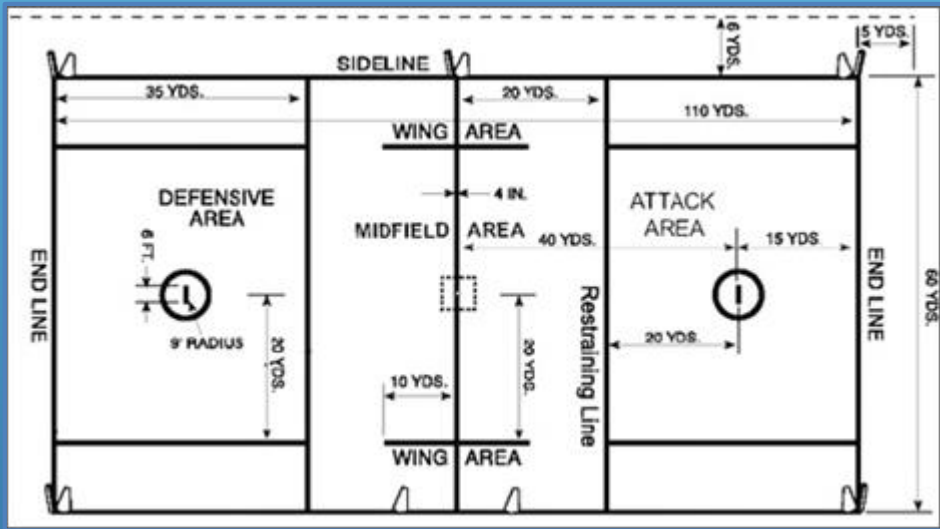

“Philosophy. The basic rule of a save is that any time a ball is stopped or deflected with any part of the goalie’s body or stick, which if not stopped or deflected would have resulted in the ball entering the goal, a save is recorded.”

**SAVES**

**NCAA  
Manual**

“The statistician should focus on what would have happened to the ball if it had not been stopped or deflected by the goalie. If the shot would have scored, then award the goalie a save. If it would not have scored, do not credit a save. The tendency is to give a goalie a save every time he touches a shot; this creates inflated statistics.”

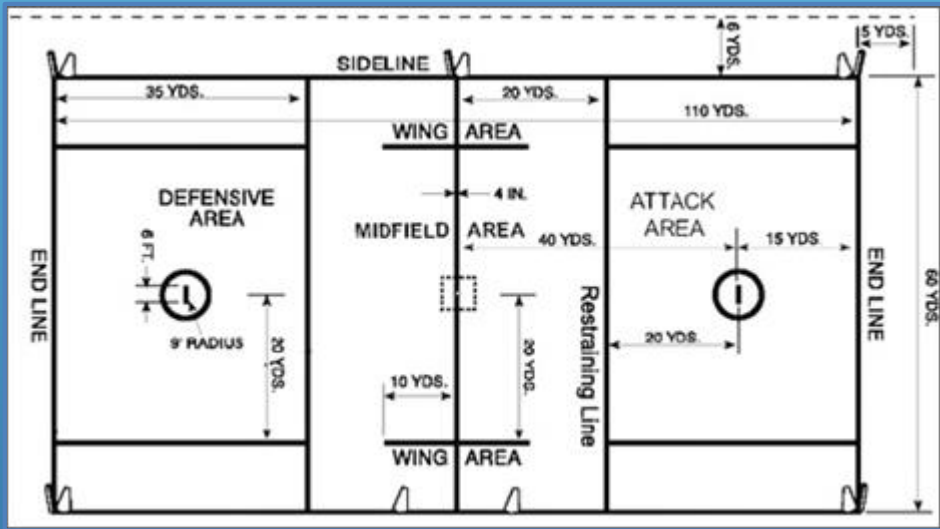

**SAVES**

**NCAA**  
Manual

“No matter how difficult it is to determine, the statistician should make consistent judgments on each shot that goalies stop or deflect.

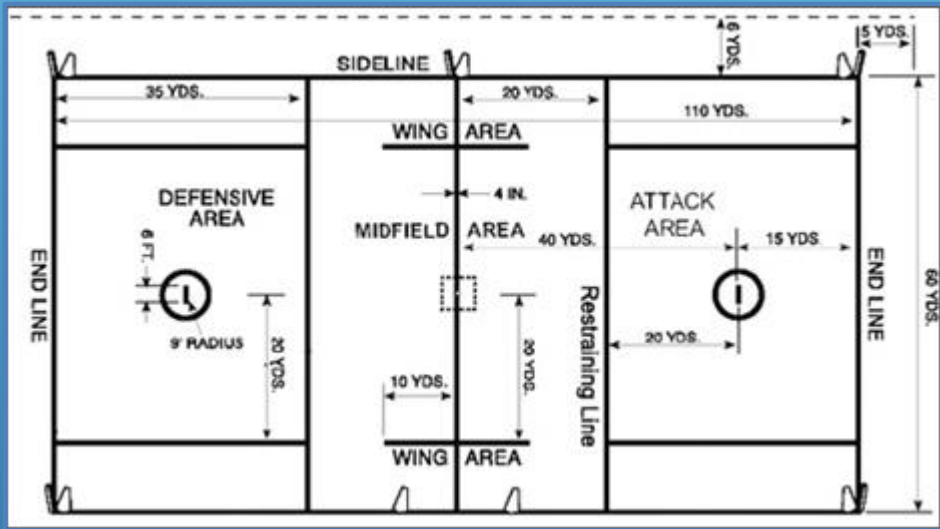

Consistency must be maintained so that the national statistics are meaningful.”

# SAVES

# NCAA Manual

“Article 1. Offensive efforts that the goalie prevents from going into the goal are considered saves. A team save can be credited in certain situations see approved rulings below). If the goalie is in the crease, no one else can be credited with a save (including a team save).”

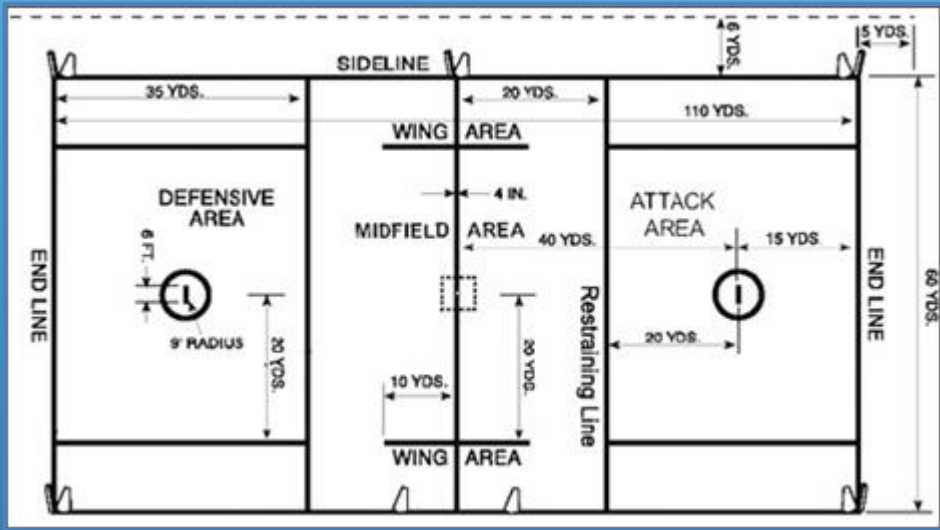

**SAVES**

# NCAA Manual

“Article 2. A blocked shot by a defenseman is not considered a save ~~unless the defenseman is in the crease and the goalie is not.~~”

In NYS defensemen cannot enter the crease to act as a goalie.

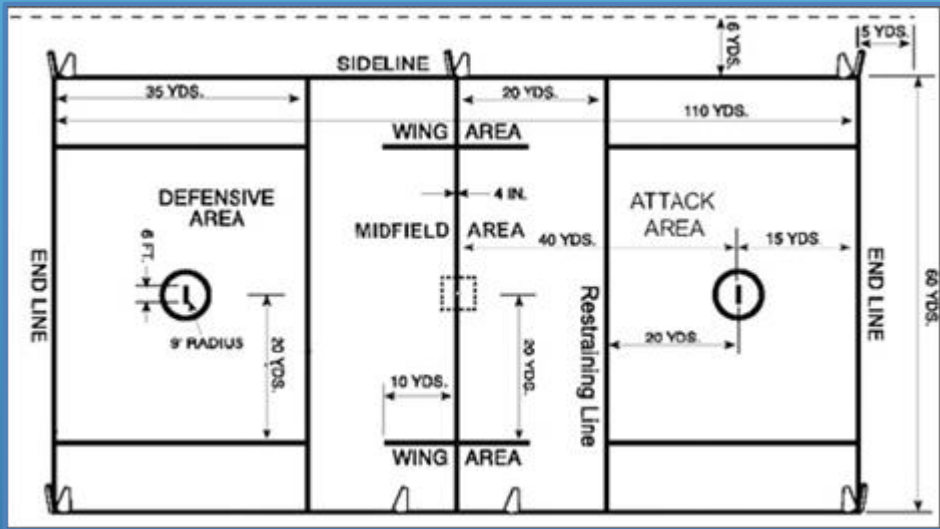

# SAVES

# NCAA Manual

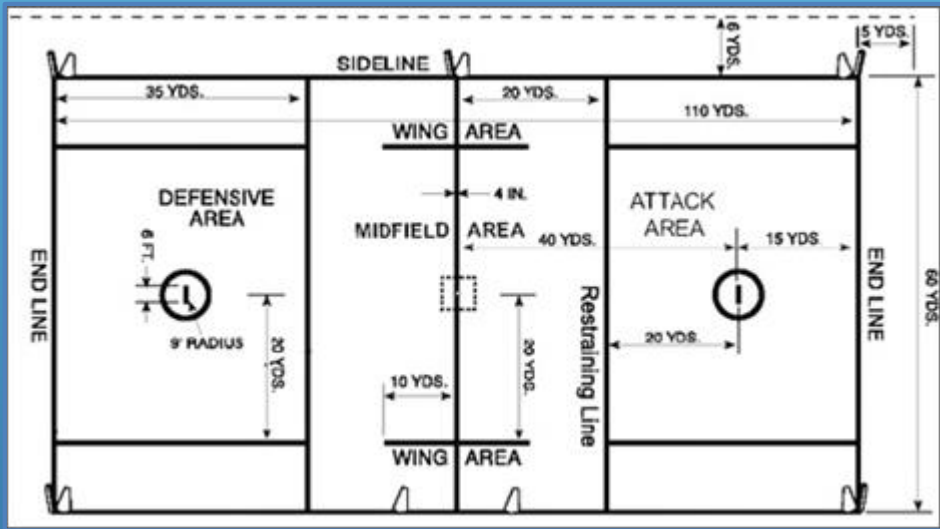

“Article 3. A shot that hits the pipe, rebounds off the goalie’s body and would go into the goal if not stopped by the goalie is credited as a save. A shot that hits the pipe, rebounds off the goalie’s body and would not go into the goal before being picked up by another player is credited as a ground ball.”

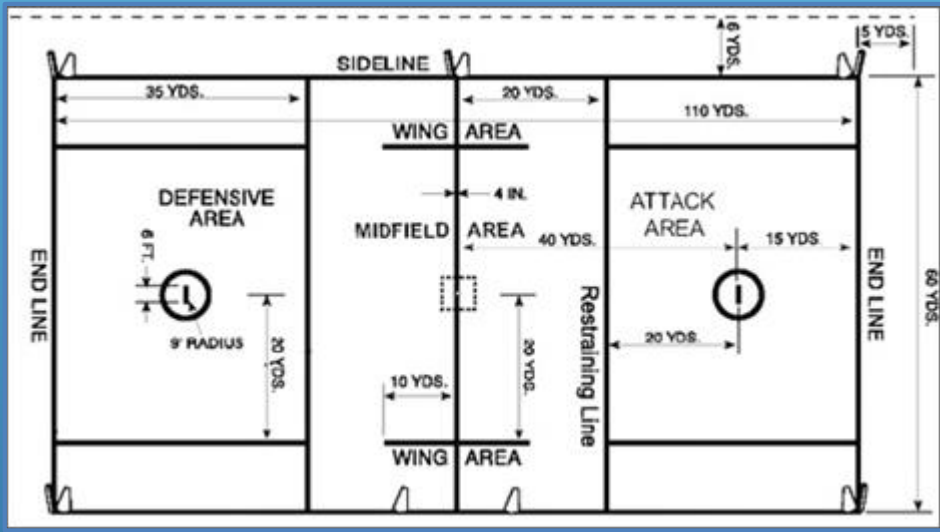

# Question

The goalie catches a shot outside the goal posts.  
Is this a save?

# Question

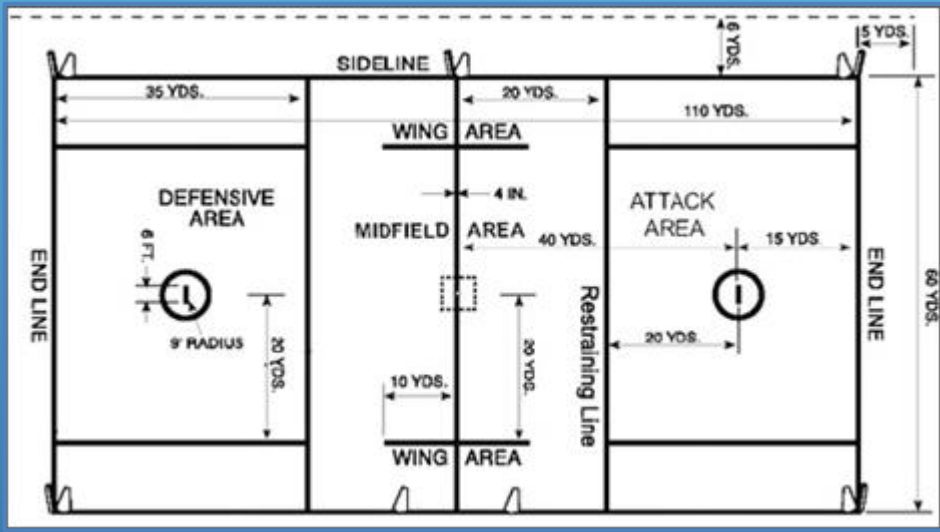

A shot is taken and the goalie stops the ball from rolling into the goal.  
Is this a save?

# Question

The goalie stops a shot and takes control of the ball. He then drops the ball into the goal.

Who get credit for the goal?

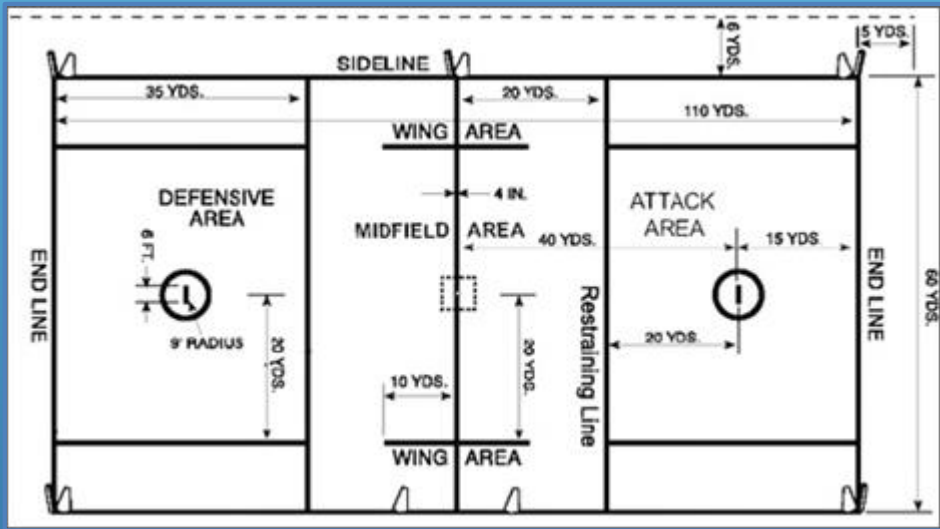

# Question

The goalie stops a shot but before he gains full control, it dribbles into the goal.

Who get credit for the goal?

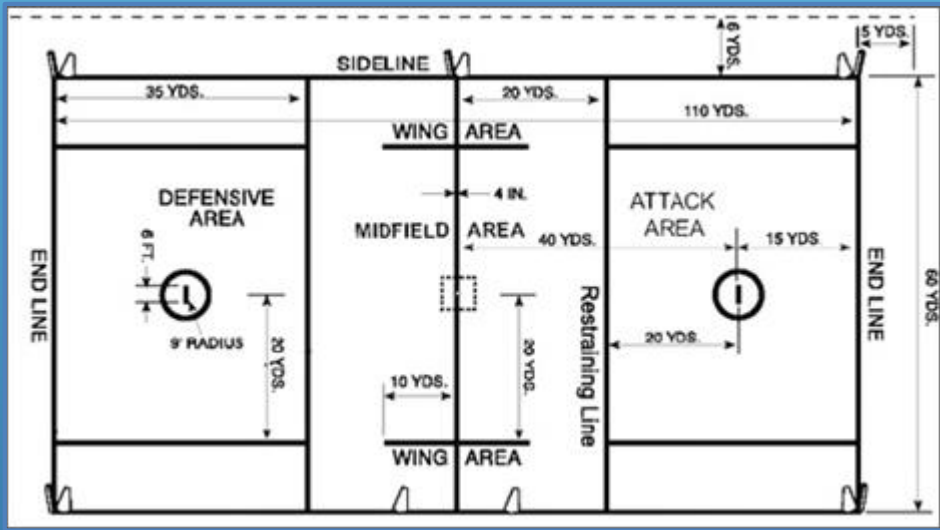

# GROUND BALLS

# NCAA Manual

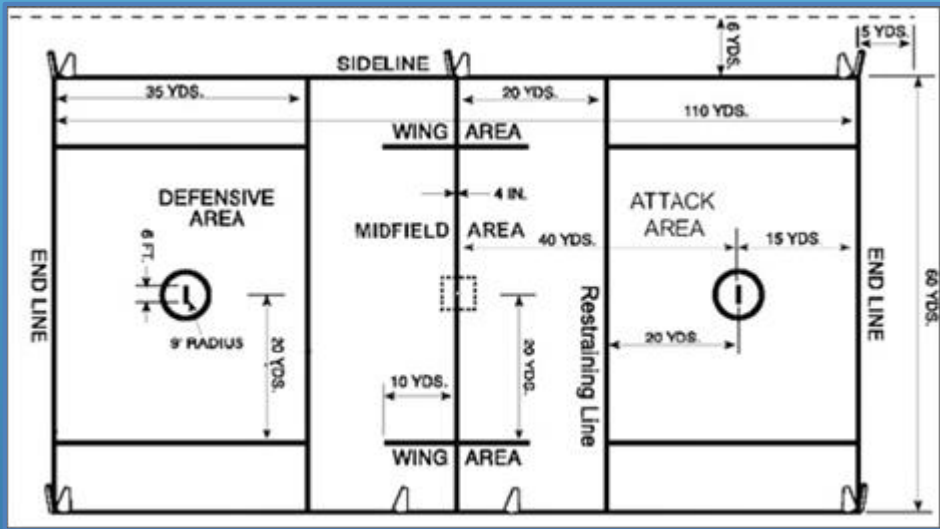

“Philosophy. Any ball not in possession of either team that comes into possession of either team should result in a ground ball once a player establishes possession and is immediately able to perform the normal functions of possession (i.e., shoot, pass, cradle), provided the ball was contested by both teams before establishing possession.”

# GROUND BALLS

# NCAA Manual

“Article 1. The statistician will determine whether or not the ball is being contested, keeping in mind that contested could refer to the original player with possession, the player gaining possession or the ball itself.”

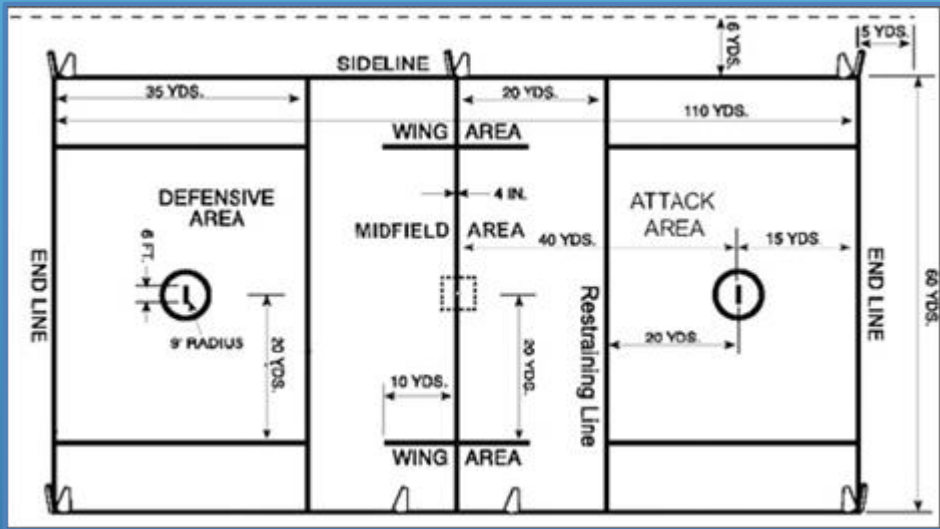

# GROUND BALLS

# NCAA Manual

“Article 2. If a player is in possession of the ball, drops it while uncontested, and then regains possession, he cannot be credited with a ground ball even if he is contested while regaining possession. If that player has the ball checked out of his stick and then regains possession, he may be credited with a ground ball.”

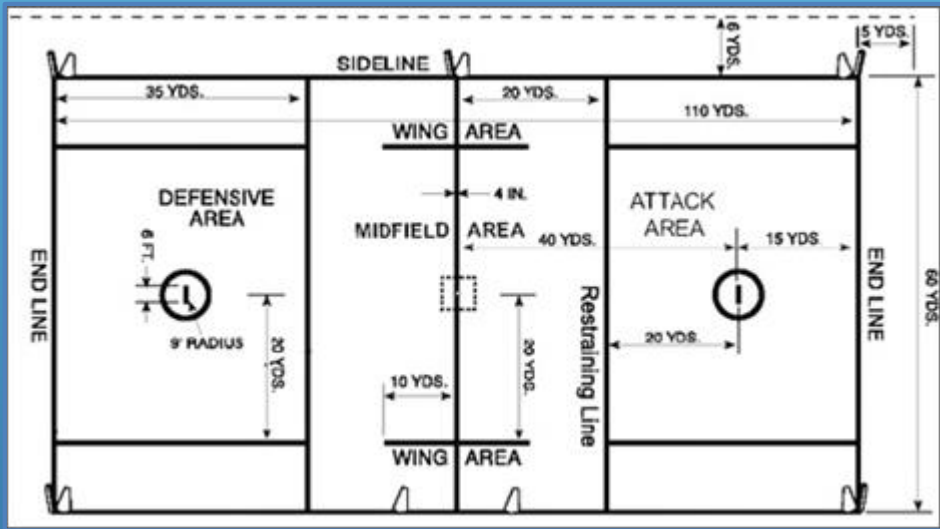

# GROUND BALLS

# NCAA Manual

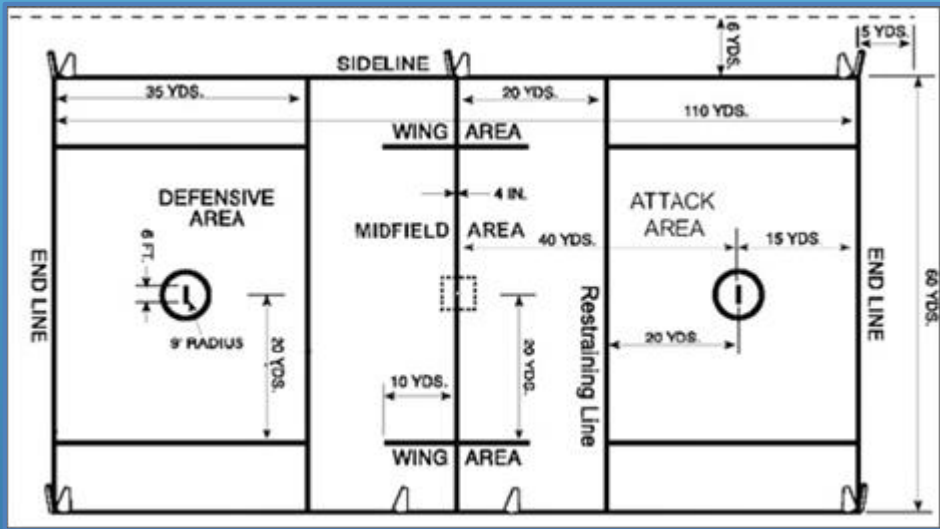

“Article 3. Ground balls can be credited as part of the faceoff play. In a faceoff situation, a ground ball should be credited to the player who gains clear possession regardless of whether or not the player gaining possession is being contested at that time.”

# GROUND BALLS

# NCAA Manual

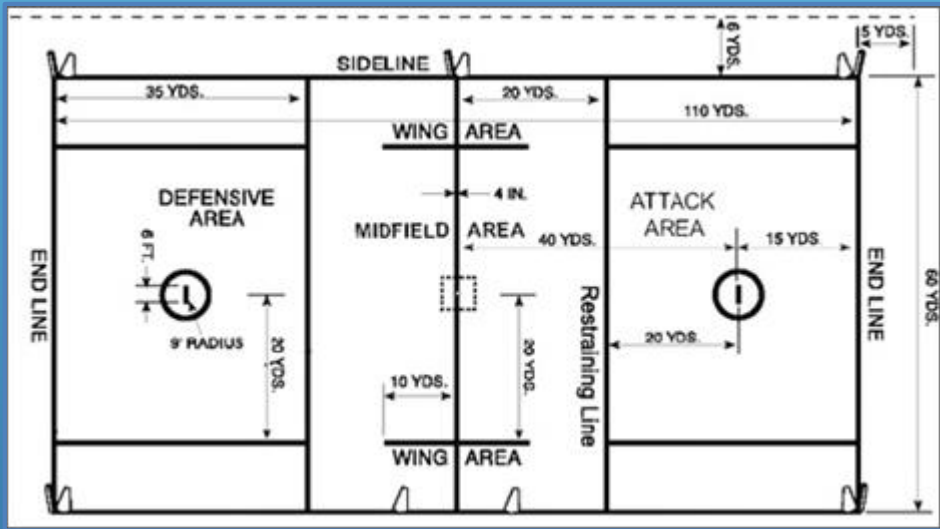

“Article 4. A ground ball should be credited to an offensive or defensive player who gains possession of the ball and prevents it from either going out of bounds or reaching the midline even if the play was not being contested. The philosophy is to give statistical credit for gaining or maintaining possession.”

# GROUND BALLS

# NCAA Manual

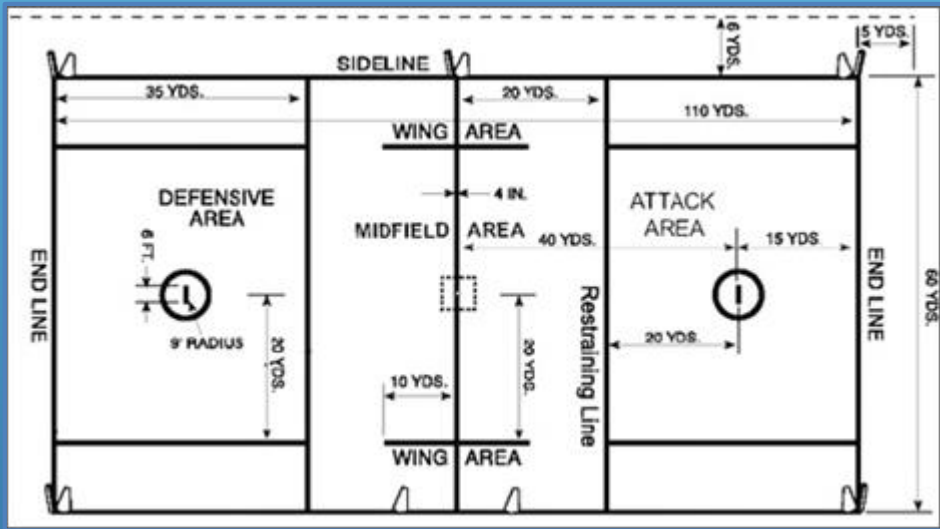

“Article 5. A loose ball that is not contested and would not reach the midline or go out of bounds should not result in a ground ball.”

# Question

A ball is passed but falls on the ground and a player on the same team picks up the ball without a challenge.

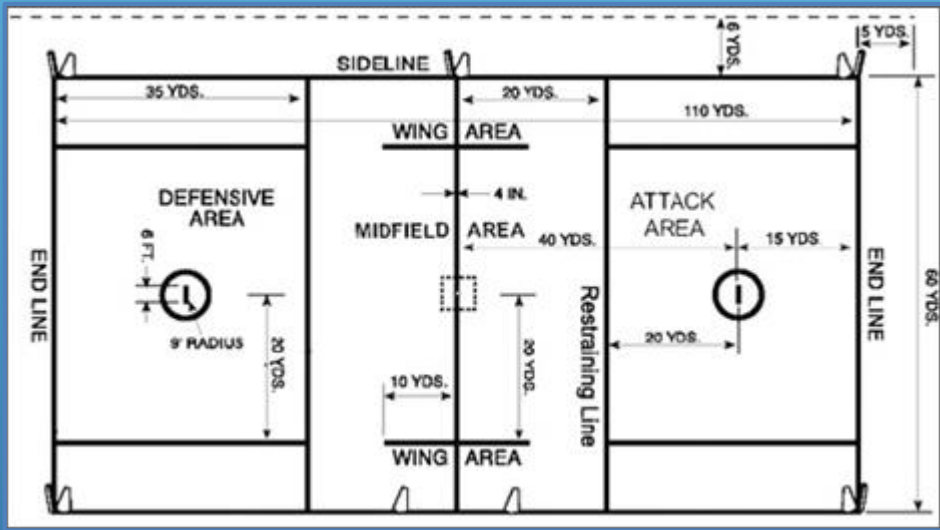

Is this a ground ball?

# Question

A ball is about to roll out of bounds but a player stops it and picks it up. There is no challenge for the ball.

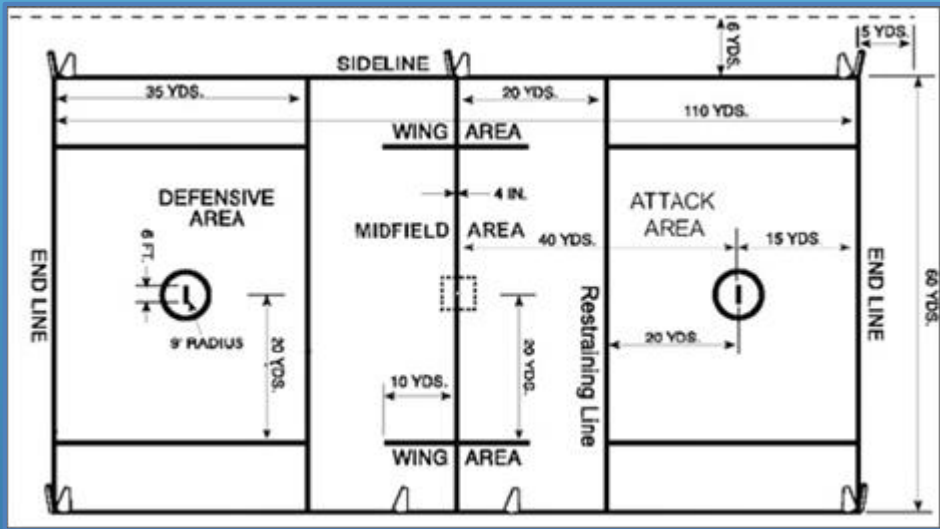

Is this a ground ball?

# Question

A ball is shot past the end line. The closest player to the ball when it goes out gets a ground ball stat. Is this True or False?

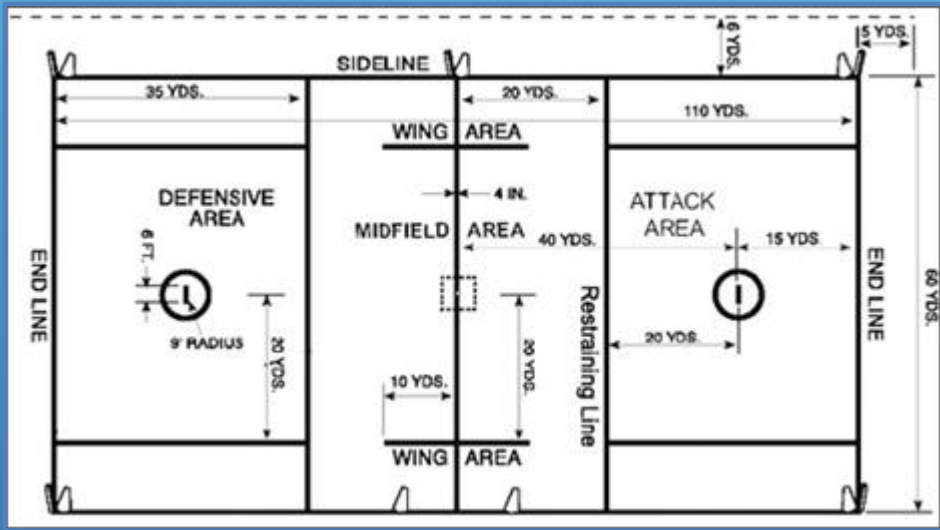

# TAKES LOBs

# NCAA Manual

“Article 1. Turnovers occur when a player or team in possession of the ball or entitled to possession of the ball loses possession of it, in a live-ball situation or under certain dead-ball situations.”

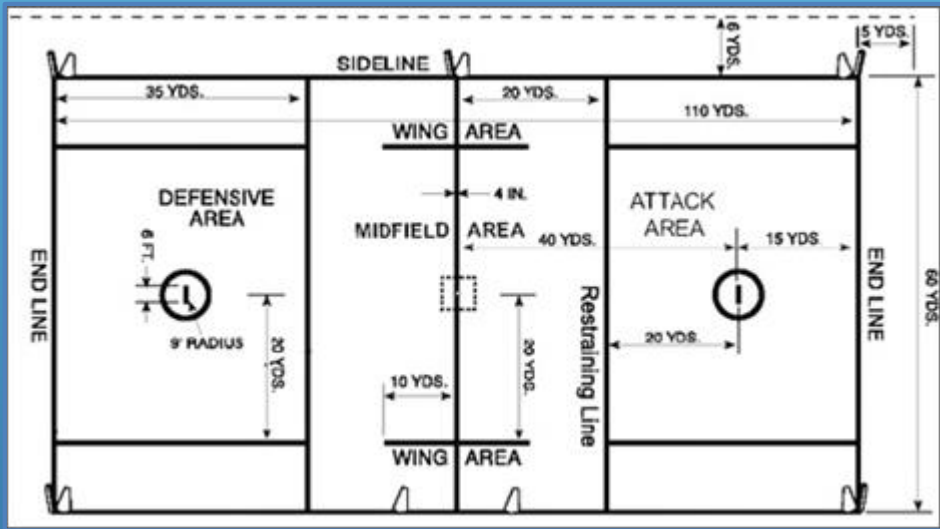

# TAKES LOBs

# NCAA Manual

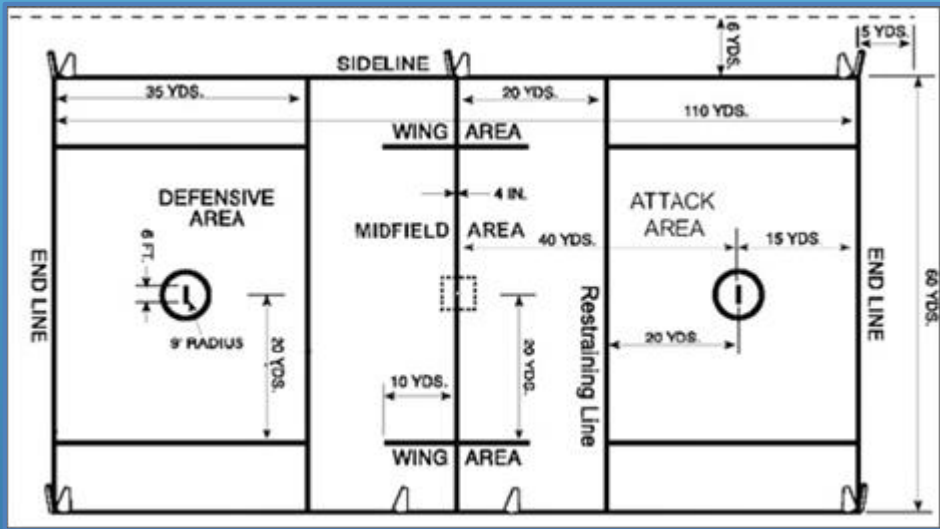

“If a single player is judged to be primarily responsible for the turnover, that player is charged with the turnover. If no single player can be judged to be primarily responsible for the turnover, or if the responsibility rests with anyone not a player, then the team is charged with the turnover.”

# TAKES LOBs

# NCAA Manual

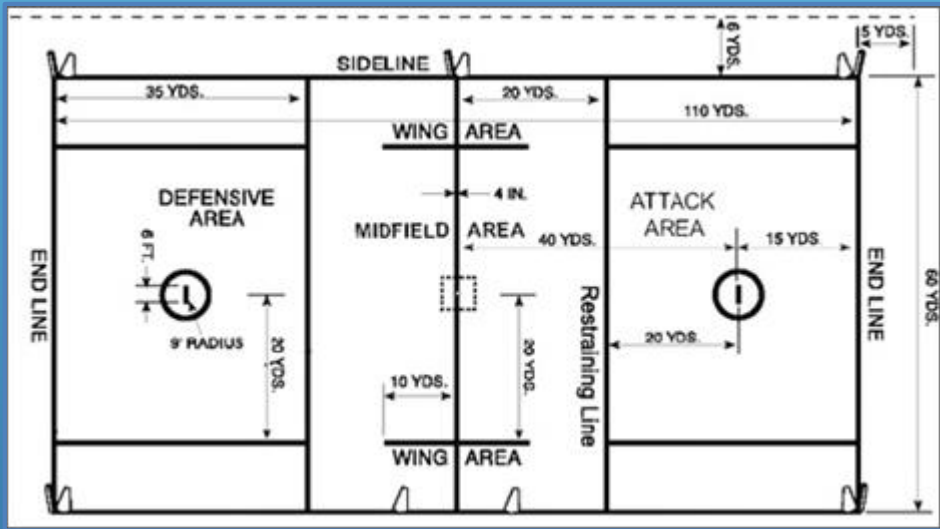

“Article 2. A caused turnover is credited to a player when the player’s positive, aggressive action(s) causes a turnover by the opponent. A turnover may not always warrant a caused turnover; however, caused turnovers can only be awarded to an individual player, and only one caused turnover can be awarded for a turnover.”

# TAKES LOBs

# NCAA Manual

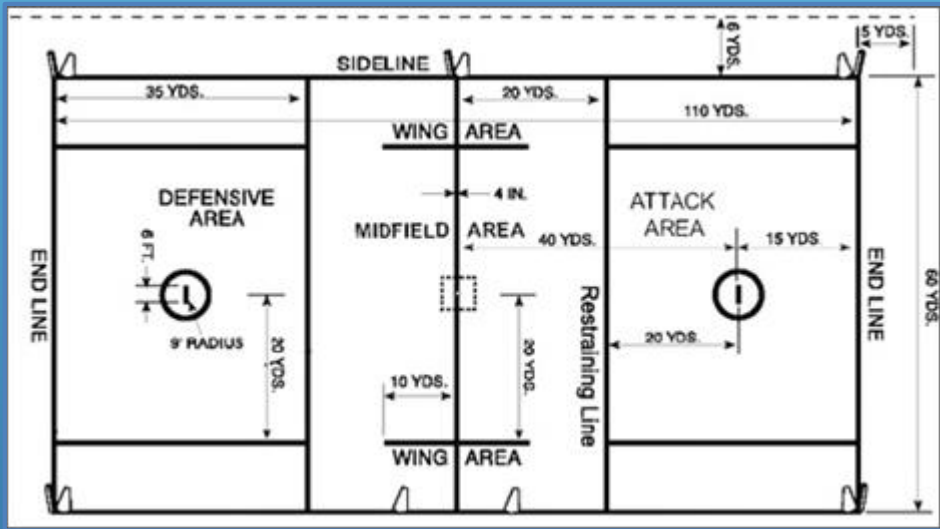

“There cannot be more caused turnovers than turnovers. Any turnover charged as a team turnover cannot have a corresponding caused turnover.”

# TAKES LOBs

# NCAA Manual

“Article 3. For a change of possession that occurs that cannot be attributed to a particular player at the moment of the violation, the turnover should be charged as a team turnover.”

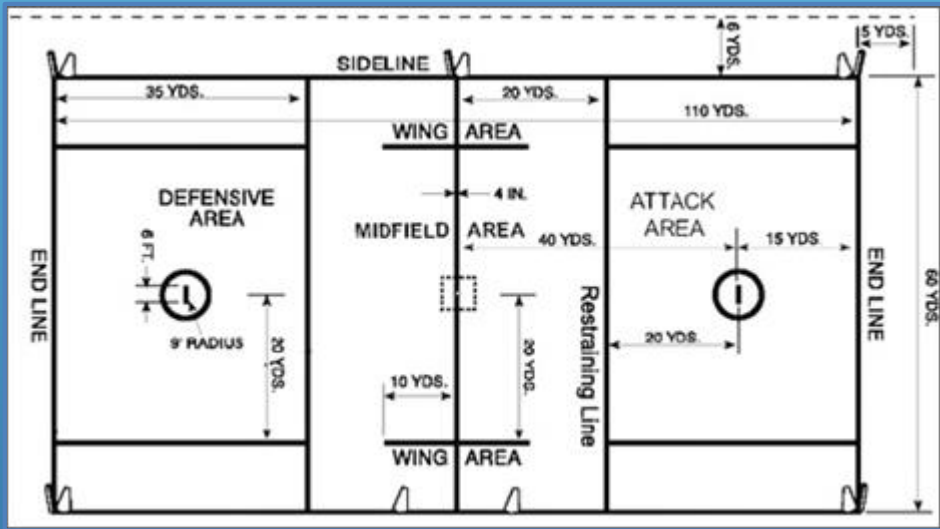

# TAKES LOBs

# NCAA Manual

“Article 4. A missed shot cannot be a turnover.

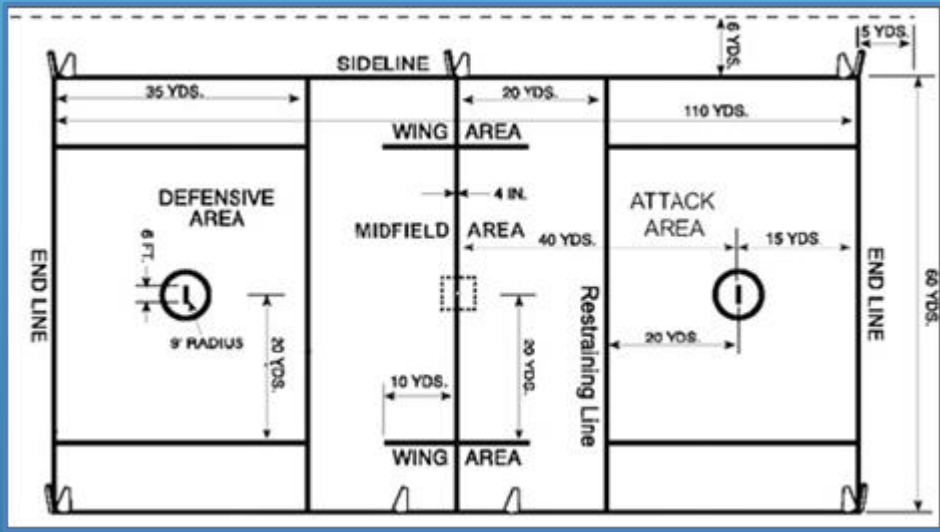

Article 5. All failed clears are by definition also turnovers.”

# TAKES LOBs

# NCAA Manual

“Article 6. A team is in possession of the ball and is called for any “failure to advance” penalty other than the failure of the goalie to leave the crease within four seconds. This should be credited as a team turnover, unless in the statistician’s opinion, one player was principally responsible...”

# Question

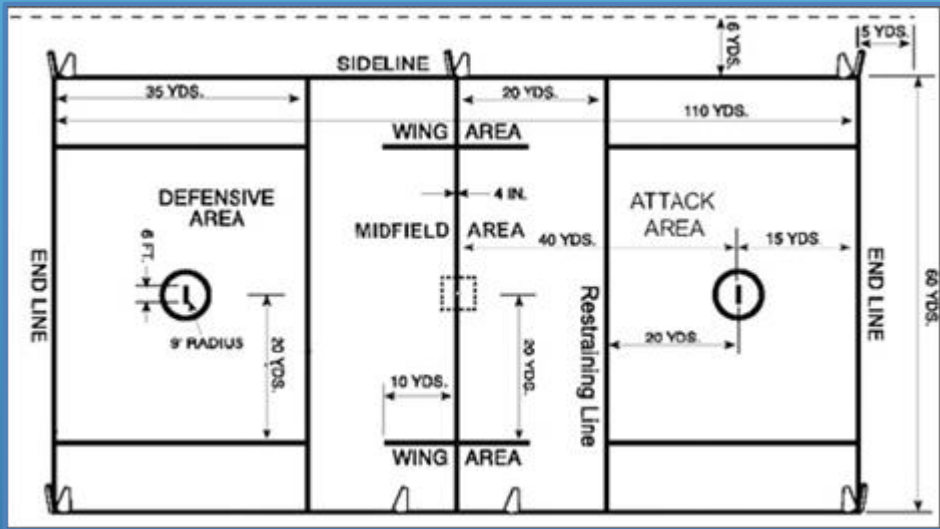

When there is a “Take” there must also be a “Loss of Ball”.

Is this True or False?

**BLaxFive.NET**

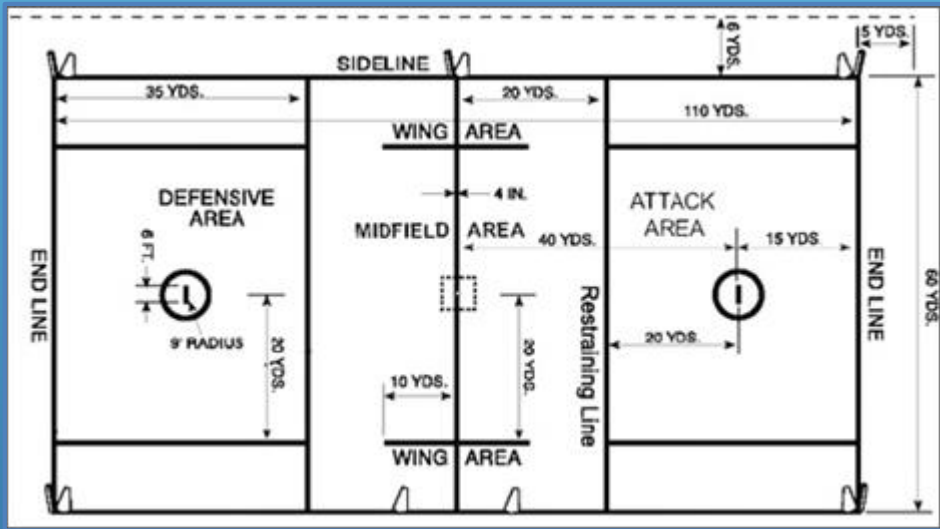

# Face offs

# NCAA Manual

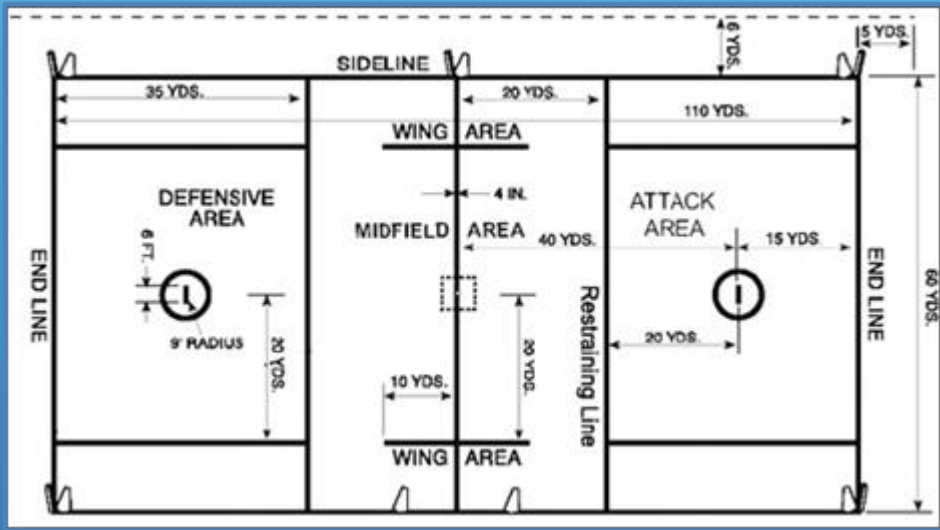

“Philosophy. Since many faceoff men must depend on the statistics of faceoffs to provide an evaluation of their value, statisticians must be consistent in their assessment of faceoffs. Since the standard in faceoff stats is to award to the faceoff man the faceoff, whether he actually obtained possession or not...”

# Face offs

# NCAA Manual

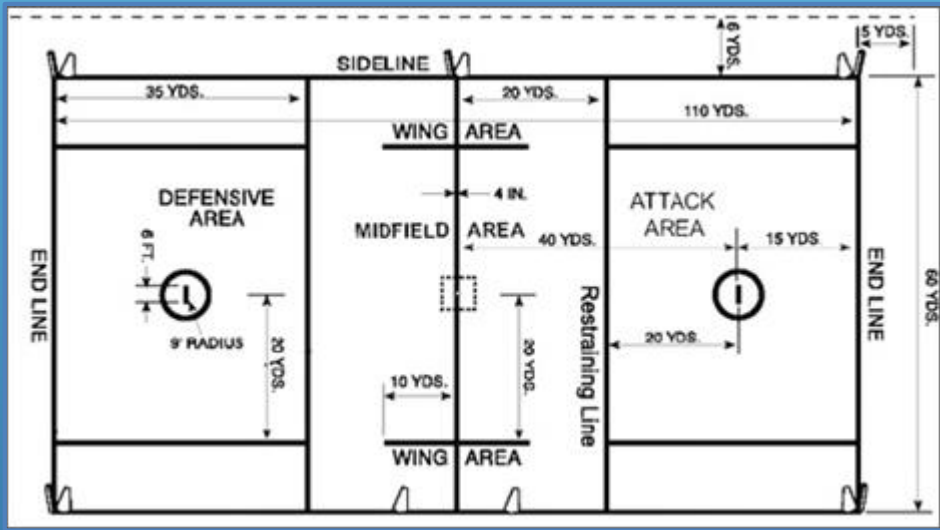

“Additionally, ground balls should be credited in faceoff play (there can be more than one) as indicated in Section 5. Every faceoff has to end with players being credited and charged with a faceoff win and loss, unless the quarter ends before possession is established.”

# Face offs

# NCAA Manual

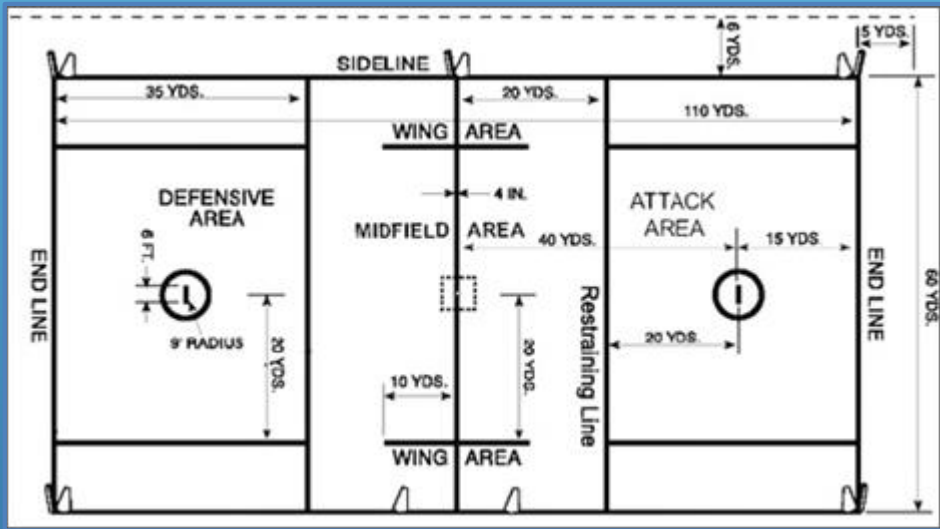

“Article 1. A faceoff win is determined by clear possession of the ball, not by the subsequent offensive opportunity.”

# Face offs

# NCAA Manual

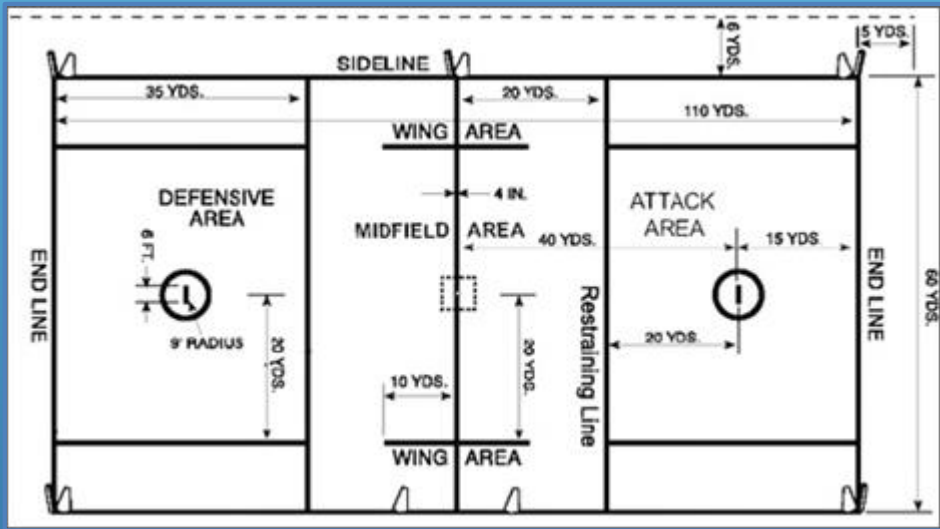

“A standard [false] alternative to that definition is to credit and charge the faceoff when one team is declared to have possession of the ball, and wing area players are released. This is not really a viable definition since a team may never have a chance to do anything with the ball.”

# Face offs

# NCAA Manual

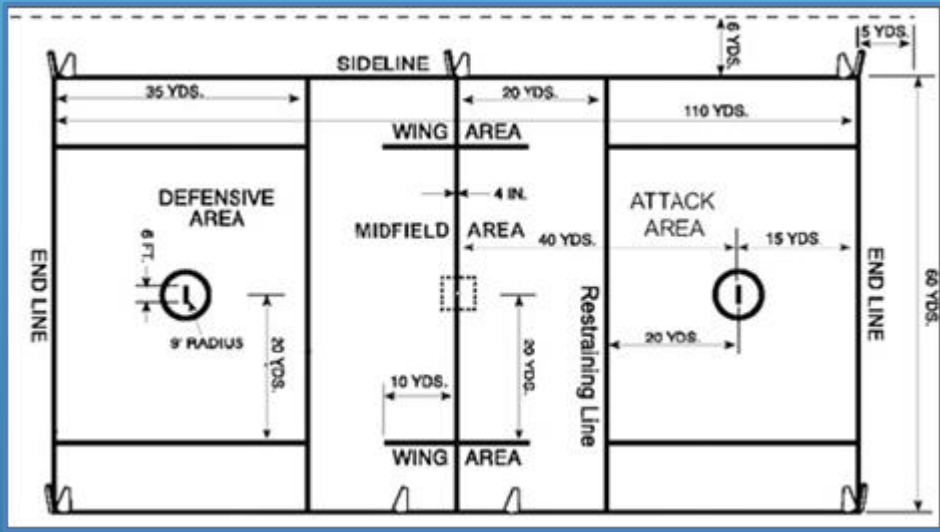

“Article 2. Credit the faceoff to the team that gains clear possession of the ball and can perform the normal functions of the possession, not based on the possession that is called by the referee.....”

# Face offs

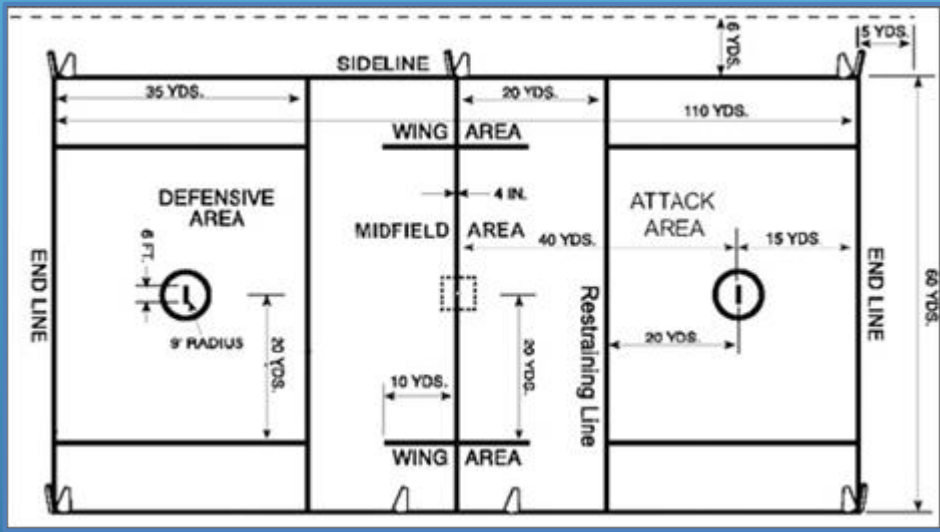

# NCAA Manual

“The referee’s signal of possession has no influence on the statistical determination of faceoff wins and losses. The referee’s signal frequently precedes the statistical definition of possession”

# Question

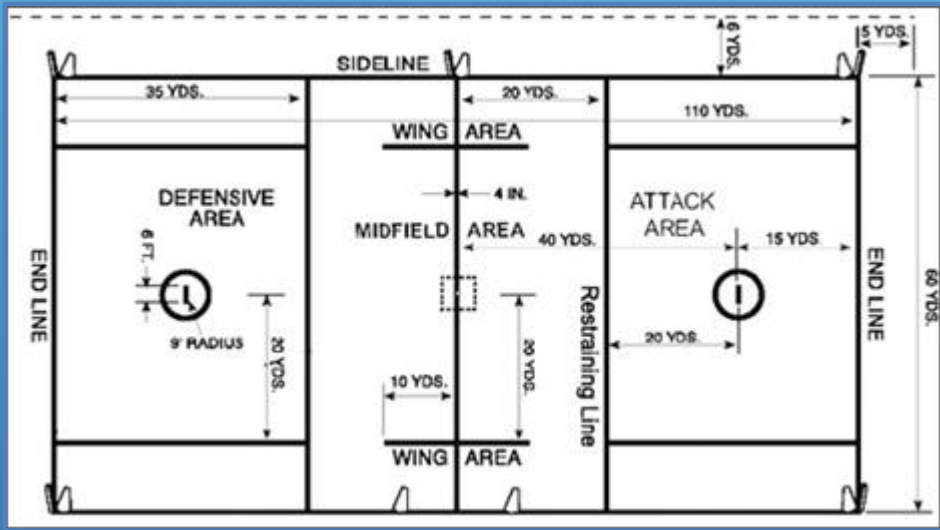

A face off must have a ground ball.  
Is this True or False?

# Question

A face off must have a winner.  
Is this True or False?

# Question

The game is in running time and a penalty is called.

When does the penalty time start?
